

water. Apply this product only as specified on label.
 This product will contain and dissolve of water. It is
 in non-cry. It is a water supplier. It should
 be stored in a cool, dry place (keep out of reach of children).

DIRECTIONS

VEGETABLES

Dilute at the rate of 1 pound to 40 gallons of water (2 level tablespoons per gallon) and apply at the rate of 100 to 200 gallons per acre (2 to 3 quarts per 50 feet of row) for control of the insects listed below.

CUCURBITS—Squash Bug: Chlordane is injurious to certain varieties of cucurbits. Do not apply this material to susceptible varieties. Do not apply to cucurbits after edible parts begin to form.

POTATOES—Colorado Potato Beetle and Flea Beetles.

TOMATOES—Hornworm: Do not use after fruit begins to form.

FLOWERS

GLADIOLI—Thrips: Use at the rate of 1 pound to 40 gallons of water (2 level tablespoons per gallon).

SOIL INSECTS

ANTS, CUTWORMS, JAPANESE BEETLE LARVAE, WHITE GRUBS, MOLE CRICKETS, AND WIREWORMS: On infested areas apply 1 pound to 10,000 square feet applied as a spray or dust and work into upper few inches of soil. For control of these pests on vegetables such as beans, cabbage, potatoes, sweet potatoes, corn, and turnips apply to the soil surface before planting and work into the upper 2 to 3 inches of soil. On flowers, shrubs and lawns apply either before planting as above or to existing plantings, working the material into the upper few inches of soil.
