See additional cautions below

READ ENTIRE LABEL. Use CUTRINE GRANULAR in accordance with all the warnings and directions and with applicable state and federal regulations.

DIRECTIONS

For control of Chara and Nitella apply 1 lb. CUTRINE GRANULAR per 400 square feet of water surface. Distribute evenly on the water surface. Do not apply to the water surface if the water is less than 18 inches deep.

Chara and Nitella should be treated only in the spring. At the end of the growing season they will naturally die back and will not be a problem in the following year.

Do not apply CUTRINE GRANULAR to areas of oxygen deficiency. If the water is very shallow, or if the water is very turbid, or if the water is very low in oxygen, do not apply CUTRINE GRANULAR.

For control of Chara and Nitella apply 1 lb. CUTRINE GRANULAR per 400 square feet of water surface.

FISH CAUTION - CUTRINE GRANULAR is highly toxic to fish. Do not apply CUTRINE GRANULAR to fish ponds or fish hatcheries.

CAUTION

Keep out of the reach of children. Do not use in areas where children play.

NOTE - CUTRINE GRANULAR is highly toxic to fish.
