DILUTION CHART FOR SWIMMING AND WADING POOLS Apply initial treatment to a freshly filled pool or at first visible signs of algae growth.	
Pool Capacity Gal. of Water	Treatment with SWIMTRINE JR. *
250	4 Ounces
500	8 Ounces
750	12 Ounces
1000	16 Ounces
1250	20 Ounces
HOW TO ESTIMATE GALLON CAPACITY OF YOUR POOL Measure Length(L), Width(W) and average Depth(D) in feet. For Square or Rectangular Pools: $L \times W \times D \times 7.5 = \text{Gallons}$ For Circular or Elliptical Pools: $L \times W \times D \times 5.9 = \text{Gallons}$ INVOLVES NO WAITING SWIM IMMEDIATELY AFTER TREATMENT	

NOTE: SWIMTRINE JR. is algaestatic rather than algacidal to some black algae. Recommended rates of SWIMTRINE JR. will prevent formation of black algae, but if black algae are already established, for best results a triple dose of SWIMTRINE JR. should be used.

*Repeat treatment every two weeks.

DO NOT REUSE CONTAINER. DESTROY WHEN EMPTY.

EPA REGISTRATION NO. 9939-A
CALIFORNIA REG. NO. 08959-00004-AA
U.S. PATENT NO. 2,734,026 Other Patents Pending

ALGAECIDE

for small

Swimming and Wading Pools

ACTIVE INGREDIENTS

Copper as elemental 0.15%

INERT INGREDIENTS 99.85%
