OBSERVE LABEL DIRECTIONS

FINTROL-15 is specially formulated for application to the epilimnion, or upper layer, of **deep** lakes and, also, for use in lakes and channels that do not exceed 15 to 20 feet in depth. It is often used in combination with the two other formulations of **FINTROL**. For instance, in lakes of varying depth, **FINTROL-CONCENTRATE** can be used in the shallows, **FINTROL-5** at depths of about 5 feet, and **FINTROL-15** at depths of from 15 to 20 feet. The active ingredient of **FINTROL-15** is released within the first 15 feet of depth. It can be applied by hand-operated or powered seed spreader mounted on a boat. Contents of this can will treat 127 acre-feet of water at 1 p.p.b.

FINTROL-15 can be used to eliminate all fish from a body of water, (complete kill). Or, it can be used to remove only certain fish species or size groups from mixed populations (selective kill).

SPECIAL INSTRUCTIONS: Prior to the use of a fish toxicant in either

public or private waters, the Director of the State Fish and Game Department or Conservation Department must be contacted to determine whether a permit is required. Such products must be used by or under the technical supervision of personnel of state and federal fish and game agencies, trained in fisheries management, who will provide any special instructions applicable to the particular geographical area.

READ ACCOMPANYING LITERATURE CAREFULLY FOR DETAILED DIRECTIONS FOR USE OF THIS PRODUCT.

Use of **FINTROL-15** does not impart detectable taste or odor to treated waters. Restocking can usually be done within a week after application.

If the remaining contents of an opened can are not to be used immediately, the silica bag must be placed on top of the contents prior to resealing to protect the contents from moisture.
