

Cross infection is of major housekeeping concern not only in hospitals, but in schools, institutions, and industry. MALCO DISINFECTANT CLEANER DC-100 is formulated for this problem area. It both cleans and disinfects effectively when used as directed. Its hard surface disinfecting action will reduce the hazard of cross infection.

Two ounces of MALCO DISINFECTANT CLEANER DC-100 per gallon of water will deodorize bath rooms, parking storage areas, and other areas where bacterial growth can cause mal odors.

**KEEP OUT OF REACH OF CHILDREN**

**DANGER:**

Causes severe eye irritation. Do not get in eye, on skin, or on clothing. Harmful if swallowed. Avoid contamination of food.

**FIRST-AID:**

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash all contaminated clothing before reuse. If swallowed, drink promptly a large quantity of water. Avoid alcohol. Call a physician immediately.

**DISPOSAL**

Do not re-use empty container. Rinse empty container thoroughly with water before discarding in trash.

**USE DIRECTIONS**

Apply MALCO DISINFECTANT CLEANER DC-100 to walls, floors and other hard surfaces such as tables, chairs and bed frames with a cloth or mop. For heavily soiled areas, a preliminary cleaning may be required.

For Hospitals & Nursing Homes: Add two ounces per gallon of water.

At two ounces per gallon use level, MALCO DISINFECTANT CLEANER DC-100 is effective against Pseudomonas aeruginosa, Staphylococcus aureus, Salmonella choleraesuis, Escherichia coli, and pathogenic fungi. Germicidal performance against the first four organisms has been confirmed by the AOAC Use Dilution Test. Fungicidal performance was determined against T. terrestris by the AOAC Fungicidal Test.

For Schools, Institutional and Industrial Uses: Add one ounce per gallon of water.

At one ounce per gallon use level, MALCO DISINFECTANT CLEANER DC-100 delivers excellent cleaning and is germicidal. It is effective against Staphylococcus aureus, Salmonella choleraesuis, Escherichia coli, and Trichopyton interdigitale (the athlete's foot fungus). The same AOAC tests used above to confirm suitable performance for hospitals were used.
