

EXTREMELY FLAMMABLE

This product is an extreme fire hazard. The flash point is 35 F Tag Open Cup and the flammable limits of vapor in air, in percent by volume, are 2.1 lower and 21.5 upper. Keep away from heat, sparks, open flame and heated surfaces.

EMPTYING DRUMS

Electrically ground drum. The best procedure is to displace the contents with an inert gas. Care must be taken to see that no appreciable pressure is exerted on the drum. A pressure relief device set for several inches of water should be installed on the inert gas line. For details, read the brochure "Propylene Oxide" available from this company.

**IN CASE OF FIRE,
SPILL OR LEAK**

Fire. Use carbon dioxide or dry chemical on small fires and "alcohol" foam on large fires. Water spray may be ineffective, but use water to keep exposed drums cool. In advanced or massive fires, firefighting should be done from a safe distance or a protected location. Wear self-contained breathing apparatus and full protective clothing.

Spill or leak. Remove all sources of ignition and keep area well ventilated. Flush away spill with large volume of water. Wear respiratory and eye protection and rubber gloves and rubber boots.

DRUM DISPOSAL

Empty drum may contain explo-

**EXTREMELY FLAMMABLE. BREATHING OF VAPOR
HARMFUL. LIQUID MAY CAUSE SKIN OR EYE BURNS.**

See side panel for additional precautions.

ACTIVE INGREDIENT

100%

EPA Reg. No. 9049-4

NET CONTENTS 53.5 Gallons

(6.92 pounds active ingredient per gallon)

DO NOT BREATH IN CLOTHING

DO NOT BREATHE VAPOR

Keep away from work. Concentration of vapor in workroom atmosphere should not exceed 100 ppm by volume as a time-weighted average for an 8-hour workday.

FIRST-AID TREATMENT

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Call a physician.

If inhaled, remove to fresh air. If not breathing give artificial respiration, preferably mouth-to-mouth. If breathing is difficult, give oxygen. Call a physician.

DO NOT GET IN EYES

Wear vaporproof goggles and face shield while working. Do not put your fingers to your eyes.

DO NOT GET ON SKIN

Wear rubber gloves and rubber footwear while working. Before removing gloves, wash them with water.

DO NOT GET ON CLOTHING

If you spill some of this product on your clothing or shoes, remove the contaminated clothing and shoes at once. Wash clothing before reuse. Discard contaminated leather shoes.

DO NOT BREATHE VAPOR

Do not allow concentration of vapor in workroom atmosphere to exceed 100 ppm by volume at a time-weighted average for an 8-hour workday.

FIRST-AID TREATMENT

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Call a physician.

If inhaled, remove to fresh air. If not breathing give artificial respiration, preferably mouth-to-mouth. If breathing is difficult, give oxygen. Call a physician.

If you spill some of this product on your clothing or shoes, remove the contaminated clothing and shoes at once. Wash clothing before reuse. Discard contaminated leather shoes.

DO NOT BREATHE VAPOR

Do not allow concentration of vapor in workroom atmosphere to exceed 100 ppm by volume as a time-weighted average for an 8-hour workday.

FIRST-AID TREATMENT

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Call a physician.
If inhaled, remove to fresh air. If not breathing give artificial respiration, preferably mouth-to-mouth. If breathing is difficult, give oxygen. Call a physician.

DO NOT CONTAMINATE CONTENTS

Hazardous polymerization may occur. Do not allow foreign material to get into this drum, particularly acidic or alkaline materials.

DIRECTIONS FOR USE

To aid in the control of microbiological spoilage and as an insecticidal fumigant for the control of stored products insects in glace fruits and dried prunes, add to the glace fruits and dried prunes in the final packaging operation at the rate of 1 milliliter per pound of product. To reduce bacterial and mold contamination in starches, gums, processed spices, cocoa, processed nutmeats (except peanuts), add in vacuum and in retorts not more than 2.4 ounces propylene oxide in vapor form per cubic foot of space in the retort. Exhaust retort within four hours and air wash. Temperature should not be in excess of 125°F.
