UNITED STATES ENVIRONMENTAL PROTECTION AGENCY WASHINGTON, D.C. 20460

OFFICE OF PREVENTION, PESTICIDES AND TOXIC SUBSTANCES

Decision No. 432713

APR 2 9 2010

Roxide International. Inc.. c/o Carrie Crawford, Regulatory Agent. 5927 Paint Bank Road New Castle, VA 24127

Subject

Revenge Rodent Smoke Bomb

EPA Reg. No. 9086-4

Our letter of March 10, 2010 Your E-Mail of April 26, 2010

Compliance with the 1991 Sulfur Re-Registration Eligibility Decision (RED), (Case 0031); 1991Carbon/CO2 RED (Case 4019); 1992 Nitrate

RED, Case 4052

Purpose

Your submission includes the revised label and Confidential Statement of Formula (CSF) to comply with the above REDs, as outlined in our March

10, 2010, letter.

Review

We have reviewed the above information and found them to be acceptable, subject to the comments below.

Labeling

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is acceptable provided that you submit one (1) copy of your final printed labeling, with the changes below, before you release the product for shipment:

> 1. To insure a consistent format for your label, *italicize*, **bold** and use the same type size for your three subheadings ("HAZARDS TO HUMANS AND DOMESTIC ANIMALS", "ENVIRONMENTAL HAZARDS", and "CHEMCIAL HAZARDS") under your heading, "PRECAUTIONARY STATEMENTS".

2019

Labelingcontinued

2. Retain the following text, which appeared in your previous stamped label of July 7, 2008, under your four illustrations in your Insert:

NOTE: The effectiveness of this product will be limited under conditions of dry or porous soil which permit the escape of toxic gases from treated burrow.

CSF

The acceptable Confidential Statement of Formula (CSF) for this product is dated April 26, 2010. All other versions are obsolete.

Existing Stocks

Stocks of product with existing labels may be used for eighteen (18) months.

Note

Should you wish to add a reference to the company's website on your label, please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

Consequence for Non-Compliance

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Questions

If you have questions about this letter, please contact me at 703-305-5407 (phone); 703-305-6596 (fax); or peaceck.dan@epa.gov (E-Mail).

Sincerely,

Kable Bo Davis

Acting Product Manager (07) Insecticide-Rodenticide Branch Registration Division (7505P)

RODENT SMOKE BOMB

FIRST AID
Have label with you when obtaining treatment advice.

- Call a poison control center, doctor, or 1-800-222-1222 (toll free number optional) immediately for treatment advice.
- Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison

control center or doctor.

lf on **Sk**in or Clothing

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 mins. Call a poison control center, doctor, or 1-800-222-1222 immediately for treatment advice.
- If Inhaled
- · Move person to fresh air.
- If person is not breathing, call an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
- Call a poison control center, doctor, or 1-800-222-1222 immediately for treatment advice.

In Eves

- · Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center, doctor, or 1-800-222-1222 immediately for treatment advice.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals WARNING: Causes eye irritation. Harmful if absorbed through skin. After Ignition, cartridge produces toxic gases (such as oxides of sulfur gases and carbon monoxide.) Fumes from ignited cartridge may be harmful if inhaled. Avoid contact with eyes, skin or clothing. Avoid breathing fumes. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS

This product is highly toxic to wildlife. Check all burrows for signs of nontarget species. If present, do not treat burrows. If present, do not treat burrows. See "Package Insert" for complete Environmental Hazards" text, including "ENDANGERED SPECIES CONSIDERATIONS".

CHEMICAL HAZARDS

Once ignited by the fuse, this cartridge will burn vigorously until completely spent and is capable of causing severe burns to exposed skin and clothes, and of igniting dry grass, leaves and other combustible materials. Keep Ignited cartridge away from your face.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

See "Insert" for complete use directions and use restrictions.

STORAGE AND DISPOSAL

PESTICIDE STORAGE: Store only in original container, in a dry place inaccessible to children and pets. PESTICIDE DISPOSAL: Nonrefillable Container. Do not reuse or refill this container.

IF EMPTY: Place in trash or offer for recycling if available.

IF PARTLY FILLED: To dispose of unused cartridges, soak in water, crush, and bury in at least 6" of loose soil. Never place unused product down any indoor or outdoor drain.

STOCK#

ENVIRONMENTAL HAZARDS/USE DIRECTIONS

Before applying product, read entire labeling (Outer Package, Cartridge, and Insert Labels) for information on ingredients, storage/disposal, use directions, and precautions.

This Insert includes the "Environmental Hazards" text, included "ENDANGERED SPECIES CONSIDERATIONS", and the "DIRECTIONS FOR USE".

PRECAUTIONARY STATEMENTS

Environmental Hazards

This product is highly toxic to wildlife. Check all burrows for signs of non-target species. If present, do not treat burrows.

ENDANGERED SPECIES CONSIDERATIONS

General Considerations

NOTICE: It is a Federal offense to use any pesticide in a manner that results in the death of a member of an endangered species,

The killing of a member of an endangered species due to the use of gas cartridges may result in a fine and/or imprisonment under the Endangered Species Act. All users of this product must determine whether endangered species are known to occur or might occur in the intended use areas.

Consult the nearest U.S. Fish and Wildlife Service regional office or the appropriate State agency for current information on habitats occupied by endangered species.

Specific Considerations

Use this product according to these instructions to protect endangered species.

<u>Black-Footed Ferret (Mustella nigripes)</u>: To limit risks to the black-footed ferret and to avoid destruction of its prey base, do not use this product within 4.3 miles (7 kilometers) of any prairie dog town <u>unless</u> the colony is an isolated black-tailed prairie dog town less than 80 acres in size or an isolated white-tailed or Gunnison prairie dog town less than 200 acres in size, or <u>unless</u> the town has been appropriately surveyed, using methods acceptable to the U.S. Fish and Wildlife Service, and found not to contain black-footed ferrets and found by the FWS not to be suitable site for ferret reintroductions.

Use of this product within the occupied habitats of the organisms listed immediately below is limited to qualified individuals who have been trained to distinguish dens and burrows of target species from those of nontarget species. Such individuals may be wildlife biologists, certified applicators, representatives of California state or Federal agencies, or agents of county agricultural offices or university extension offices.

<u>Fresno kangaroo rat (Dipodomys nitratoides exills)</u> in Fresno and Merced Countles, California.

<u>Giant kangaroo rat (D. Ingens)</u> in Merced, Fresno, Kings, Tulare, Kern, San Luis Obispo, and Santa Barbara Counties, California.

<u>Stephen's kangaroo rat (D. Stephensi)</u> in Riverside, San Diego, and San Bernadino Counties, California.

2

<u>Tipton kangaroo rat (D.n.nitratoides)</u> in Kings, Tulare, Kern and Fresno Counties, California.

Point Arena mountain beaver (Aplodontia rufa nigra) in Mendocino County, California. San Joaquin kit fox (Vulpes macrotis mutica) unless authorized by the U. S. Fish and Wildlife Service in Alameda, Contra Costa, Fresno, Kern, Kings, Merced, Monterey, San Benito, San Joaquin, San Luis Obispo, Santa Barbara, Santa Clara, Stanislaus, or Tulare Counties, California.

<u>Desert Tortoise (Fopherus agassizil)</u> in Arizona, southern California, southern Nevada, and southern Utah,

Do not use this product within the occupied habitats of the endangered animals listed immediately below.

<u>Hualapal Mexican yole (M. mexicanus hualpalensus)</u> in Mohave County, Arizona. <u>Morro Bay kangaroo rat (D. heermanni morroensis)</u> in San Luis Obispo County, California.

<u>Utah prairie dog (Cvnomys parvidens)</u> in Garfield, Iron, Kane, Piute, Sevier, and Wayne Countles. Utah.

<u>Coachella Valley fringe-toed lizard (Uma inormata)</u> In the Coachella Valley area of southern California.

<u>Island night lizard (Xantusia riversiana)</u> on Santa Barbara, San Clemente, and San Nicolas Islands, California.

<u>Blunt-nosed leopard lizard (Gambella silus)</u>: Do not use this product within the occupied habitat of the blunt-nosed leopard lizard in Fresno, Kern, Kings, Merced, Monterey, San Benito, San Luis Obispo, Santa Barbara, Santa Clara and Stanislaus Counties, California, from October 1 to April 15 <u>unless</u> a specific blunt-nosed lizard protection plan for this period is approved by the U.S. Fish and Wildlife Service and fully implemented. Use of this product in occupied habitat of this species from April 15 through September 30 is limited to daylight hours when air temperatures are 77-95° F (20-30° C).

San Francisco garter snake (Thamnoiphis sirtalis tetrataenis): Do not use this product within the occupied habitat of the San Francisco garter snake in San Mateo, San Francisco, Santa Clara, and Santa Cruz Counties, California from November 1 to March 30 unless a specific San Francisco garter snake protection program for this period is approved by the U.S. Fish and Wildlife Service and fully implemented. Use of this product in occupied habitat of this species under such approved programs or from April 1 through October 31 is limited to qualified individuals who have been trained to distinguish dens and burrows of target species from those of nontarget species. Such individuals may be wildlife biologists, certified applicators, representatives of California State or Federal agencies, or agents of county agricultural offices or university extension offices.

Eastern Indigo snake (Drymarchon corals couperf): Do not use this product within habitat types and locales known to support the Eastern Indigo snake throughout Florida and the coastal plain of Georgia.

<u>Gopher tortolse (Gopherus polyphemus)</u>: Do not use this product in or adjacent to known gopher tortolse occupied habitat west of the Mobile and Tombigbee Rivers in Alabama.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

USE RESTRICTIONS:

FOR OUTDOOR USE ONLY. This product may be used only to control woodchucks and pocket gophers in non-crop areas (including residential lawns, parks, golf courses, reforested areas, open fields) and in rangeland. Do not use where use of gas cartridges is prohibited by local ordinances. Do not use under buildings, homes, porches or any structure due to possible fire hazard.

Only use inside of burrows and never inside of buildings. Product effectiveness may be limited in dry or porous soil which permits the escape of toxic gases from treated burrow.

PRIOR TO APPLICATION:

Carefully observe areas to be treated. Apply cartridges only to burrow systems or dens currently being used by target species. Do not apply cartridges to burrows or dens known or believed to contain non-target vertebrate animals. Do not use cartridges where vegetation is dry and likely to catch fire.

APPLICATION STEPS:

- Read and understand the specific directions for the type of animal that you intend to control.
- Collect sufficient soil, rocks or other noncombustible materials to close burrow system after insertion of cartridge.
- 3. Make sure the burrow or den hole(s) are large enough for easy insertion of cartridge.
- Position yourself so that you can light fuse and promptly insert cartridge into burrow.
 The minimum burn time is 5 seconds. Avoid breathing cartridge smoke.
- 5. Prepare hold for treatment as specified below [on this label] for target animal control.
- 6. Insert fuse into cartridge, making sure at least two inches of fuse protrudes from the cartridge (minimum burn time 5 seconds). Working quickly, light fuse and insert cartridge into hole <u>fuse-end first</u>. Never light the cartridge directly [or with less than 2 inches of fuse] nor hold a burning cartridge in your hand. Cover hold immediately with rock or sod, taking care not to smother cartridge. Immediately cover all openings from which gas escape is visible.

<u>Woodchucks</u>: Locate all entrances. Select one for treatment and close all other entrances with rock or dirt. Follow Application Steps 1-6 above [on this label]. Consult state game laws before using this product for woodchuck control.

Pocket Gophers: Burrow Preparation - Locate a characteristic fan-shaped soil mound with signs of recent activity (e.g., recently excavated soil) at plugged burrow entrances. Determine if burrow is active by removing soil plug from center of each burrow entrance. Return the next day to see if the burrow opening has been re-plugged, indicating active use by a pocket gopher. DO NOT treat burrows that remain unplugged. Find the horseshoe-shaped depression on one side of the plugged mound. Locate the main runway by probing the ground 15-18" (38-46cm) from the mound, starting on the same side as the depression. The main runway has been located when friction on the probe is released and it falls into the runway. Using a shovel or trowel, dig down to the main runway, taking care not to block it with soil, to create a hole. Follow Application Steps 1-6 above [on this label]. Treat all active mounds. One cartridge placed in the end of a runway should be sufficient. One or more additional cartridges should be used if treatment takes place in the middle of runway or if runway is "T-shaped" to reach pocket gophers that may be on the untreated side of the plugged runway. Re-treat in 5-7 days if new or residual activity appears.

QUESTIONS OR COMMENTS?

Call 1-914-630-7700. Weekdays, 9-5 Eastern Time Or write Jim Barry, Consumer Relations EPA Reg. No. 9086-4, EPA Est. No. 9086-THA-001 Manufactured for: Roxide International, Inc. P. O. Box 239 Larchmont, NY 10538
