## Chlorination Tablets

Contains no calcium

**DANGER:** KEEP OUT OF REACH OF CHILDREN. See other precautions and antidote on side panel.

Active Ingredient	Trichloro-s-Triazinetrione	95%
Inert Ingredient	(Available chlorine 86.5%)	5%

**DIRECTIONS FOR USE:**

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING

TABEX Slow Dissolving Chlorination Tablets are an extremely concentrated form of swimming pool sanitizing agent. TABEX Chlorination Tablets are designed to dissolve slowly and at a uniform rate thereby eliminating the nuisance of frequent hand feeding of granular or liquid chlorination. We suggest the use of the TABEX Aquarian Feeder for the ultimate convenience of continuous, automatically dispensed chlorination.

**FOR CONTINUOUS DAILY CHLORINATION**

Before the first use of TABEX SLOW DISSOLVING CHLORINATION TABLETS, be sure to take the following steps:

A. Adjust the pool water pH to between 7.2 and 7.8 as determined by the TABEX Swimming Pool Test Kit. Further adjust your Total Alkalinity to a minimum of 100 ppm (parts per million).

B. Stabilize pool water to at least 50 ppm with TABEX Conditioner as directed on container label. Thereafter regular use of TABEX Slow Dissolving Chlorination Tablets for daily chlorination will provide any needed makeup Conditioner.

C. Superchlorinate (SHOCK TREAT) your pool water to a 4 ppm residual chlorine level using TABEX Super Shock Tablets as directed on the container label.

D. Once your pool has been made "ready" by following A, B & C above, use these Slow Dissolving Chlorination Tablets to maintain the free residual chlorine level at a safe and efficient 1.0 to 1.5 ppm of FREE available chlorine at all times, as determined by the DAILY or more frequent use of the TABEX 4-1 Swimming Pool Test Kit.

E. By means of the TABEX Aquarian Feeder, TABEX Floater or TABEX Skimmer Dispenser, immerse one TABEX Slow Dissolving Chlorination Tablet (or as many of them as may be necessary to maintain the safe FREE available chlorine level) for each 5,000 to 10,000 gallons (18,920 to 37,840 liters) of pool water.

NEVER ADD THESE SLOW DISSOLVING CHLORINATION TABLETS DIRECTLY INTO THE WATER AS DISCOLORATION OF THE POOL LINER OR FINISH WILL OCCUR.

F. Superchlorinate (SHOCK TREAT) your pool water at least twice monthly (more often in Sunbelt regions) during hot weather and peak bather loads. Failure to Superchlorinate regularly could result in the growth of Algae in your pool. To control algae, use TABEX Algae Out as directed on the container label.

**DANGER:** Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

**PHYSICAL AND CHEMICAL HAZARDS:** Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

**PRACTICAL TREATMENT:** (First Aid) If swallowed feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin. Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in Eyes. Flush with cold water for at least 15 minutes. Get medical attention.

**STORAGE AND DISPOSAL:** Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or open flame. In case of decomposition isolate container if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.
