

MORE FUN / LESS WORK FOR POOL OWNERS

DIRECTIONS: Add Rapid Chlorine Tabs Through Skimmer or Float Device. Do Not Throw in Pool.

TO SUPERCHLORINATE (SHOCK TREAT): Regular, periodic shock treatment helps maintain clear, sparkling pool water by controlling algae, and reducing wastes such as suntan lotions, urine, perspiration and mucous discharge.

1. Superchlorination is achieved by quickly raising the chlorine residual level to 4 ppm. Do this by adding, through skimmer, 4 Tabex Rapid Chlorine Tabs for every 10,000 gallons of pool water.
2. Allow chlorine residual to return to 1.0 to 1.5 ppm level before using pool.

FOR CONTINUOUS DAILY CHLORINATION: Before the first use of Tabex Rapid Chlorine Tabs for continuous daily chlorination, be sure to take the following steps:

- A. Adjust pool water pH to 7.2 to 7.8 range as determined by suitable pH test kit. Use Tabex pH Up if pH is low, Tabex pH Down if pH is high, or Tabex pH Stabilizer if water alkalinity is below 100 ppm.
- B. Stabilize pool water to 30 ppm of conditioning agent by adding 1 lb. of Tabex Conditioner for each 4,000 gallons. Thereafter, regular use of Tabex Rapid Chlorine Tabs will provide any needed makeup conditioner.
- C. Superchlorinate with Tabex Rapid Chlorine Tabs per directions above.

Once pool water is "ready" per A, B and C, chlorinate daily with Tabex Rapid Chlorine Tabs to maintain chlorine residual at safe, efficient 1.0 to 1.5 ppm level at all times:

1. One tab per 8,000 gallons of pool water, added daily through skimmer or float device, is usually sufficient to maintain 1.0 to 1.5 chlorine

Tabex®
Rapid Chlorine Tabs

DANGER: KEEP OUT OF REACH OF

Tabex[®]

Rapid Chlorine Tabs

DANGER: KEEP OUT OF REACH OF CHILDREN. See other precautions and first aid on side panel.

Active Ingredient: Trichloro-s-Triazinetrione	60%
Inert Ingredient	40%

(Available chlorine, 54%)

Contents: 48 - 2.5 oz. tablets
Net Weight: 120 oz. (7 lbs. 8 oz.)

swallowed. May cause burns on wet skin. Rinse hands after handling. Strong oxidizer: Do not mix with any other chemical; mix only with water. Do not get into eyes. If in eyes, rinse with cold water, call physician. Avoid inhalation of dust and vapors. Keep away from organic matter (may cause fire), heat or open flame. Keep dry; chlorine and equally toxic gases liberated when wet. Do not reuse container. Rinse thoroughly with water and discard.

FIRST AID: Drink milk of magnesia, vegetable oil or whites of eggs and call a physician.

This product is toxic to fish. Treated pool water should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

IMPORTANT: Add Rapid Chlorine Tabs Through Skimmer or
Floating Device. Do Not Throw In Pool.

SAFETY (SHOCK TREAT): Regular, periodic shock treatment helps maintain clear, sparkling pool water by controlling algae and reducing wastes such as suntan lotions, urine, perspiration and mucous discharge.

1. Superchlorination is achieved by quickly raising the chlorine residual level to 4 ppm. Do this by adding, through skimmer, 4 Tabex Rapid Chlorine Tabs for every 10,000 gallons of pool water.

2. Allow chlorine residual to return to 1.0 to 1.5 ppm level before using pool.

FOR CONTINUOUS DAILY CHLORINATION: Before the first use of Tabex Rapid Chlorine Tabs for continuous daily chlorination, be sure to take the following steps:

A. Adjust pool water pH to 7.2 to 7.8 range as determined by suitable test kit. Use Tabex pH Up if pH is low, Tabex pH Down if pH is high, Tabex pH Stabilizer if water alkalinity is below 100 ppm.

B. Condition pool water to 30 ppm of conditioning agent by adding 1 lb. Tabex Conditioner for each 4,000 gallons. Thereafter, regular use of Tabex Rapid Chlorine Tabs will provide any needed makeup chlorine.

C. Superchlorinate with Tabex Rapid Chlorine Tabs per directions above.

When pool water is "ready" per A, B and C, chlorinate daily with Tabex Rapid Chlorine Tabs to maintain chlorine residual at level, with 1.0 to 1.5 ppm level at all times.

One tab per 4,000 gallons of pool water, added daily through skimmer or float device, is usually sufficient to maintain 1.0 to 1.5 chlorine residual level, but always test with suitable chlorine test kit. If suitable reading is not registered with this device, use one or more additional tabs as needed.

Superchlorinate at least twice a month per directions above.

Active ingredient: Trichloro-s-Trinitrobenzene 60%
Inert ingredient 40%
(Available chlorine 54%)

Contents: 48 - 2.5-oz. tablets
Net Weight: 120 oz. (7 lbs. 8 oz.)

Trichloro-s-Trinitrobenzene Tablet Brand Chlorine Tablets are formulated to provide a long-lasting, powerful (shock treatment) of chlorine to your pool water.

Precautions: May cause eye damage. May be fatal or harmful if swallowed. Do not use on wet skin. Rinse hands after use. Do not mix with any other chemicals. Do not get into eyes. If it does, rinse with water. Do not breathe fumes. Avoid inhalation of dust and vapors. Do not use in confined spaces. Do not use near open flame or heat. Do not use near electrical equipment. Do not use near children. Do not use near swimming. Do not use near food. Do not use near drink. Do not use near clothing. Do not use near furniture. Do not use near anything else.

First Aid: In case of contact with eyes, flush with water. In case of contact with skin, wash with soap and water. In case of contact with clothing, remove clothing and wash with soap and water. In case of contact with food or drink, do not eat or drink. In case of contact with anything else, do not use it.

This product is toxic to fish. Treated pool water should not be used for drinking. It will drain into lakes, streams, ponds or other bodies of water. Do not contaminate water by cleaning of equipment or disposal of waste. Apply this product only as specified on this label.
