

1. Adjust pool water p^{μ} to 7.2-7.8 range as determined by suitable test kit.

.t

2. Stabilize pool wifer with 30 ppm conditioning agent (100% cyanuric acid)

3. Before first use of the feeder canister, superchlorinate (shock lisat) pool water to 4 ppm chlorine residual, as determined by use of 3 chlorine test kit. Avoid entering pool until the chlorine residual crups to 2.0 ppm

4 Before using the feeder canister, remove bottom cap (to permit which circulation) and remove tab over vent hole in top hid ite avoid air lock).

5. Maintain a childrine residual of 1.0 to 1.5 ppm at all times (as detective by daily or more frequent use of a chlorine test kill = in metsing one Tabex chlorine fablet (or more until residual at 2015 red) in the Tabex Aquarian Feeder for up to 10,000 \pm 3.10ns in pool water per tablet, by the positioning of the carister in the feeder acd or adjustment of the water level in the feeder chamber, up to three tablets in a canister may be immersed. Two canisters may be inserted into the feeder, thus up to 6 tablets may be immersed at one time. This canister of tablets is designed for use in the Tabex Aquarian Feeder bound. Tablets in canister should not be emptied directly in the pool as discoloration of the pool liner or paint could occur.

6. During the summer and peak bather loads, superchlorinate (shock treat) at least twice monthly as directed in "3" above Failure to superchlorinate could result in growth of pool water algae. For such a condition, use Tabex Algae Out as directed on container.

ST DOCUMEN

7. Replace canister when last tablet drops into feeder.

19087-4 Commind

CONVENIENT, ECONOMICAL POOL CHLORINATION ¹⁷⁷ This carister containing 6 patented (U.S. Patent 3,325,431)

-

slow dissolving, completely soluble Taber Chlorine Tablets ⁴ has been expressly designed for use with the Taber Aquarian Feeder to provide a continuous, economical chlorine supply for control of bacteria and algae when used as directed.

DANGER: May cause eye damage. May be fatal or harmful if swallowed. May cause burns on wet skin. Rinse hands after handling. Strong oxidizer: Do not mix with any other chemical mix only with water. Do not get into eyes. If in eyes, rinse with cold water, call physician. Avoid inhalation of dust and vapors. Keep away from organic matter (may cause fire), heat or open flame Keep dry---chlorine and equally toxic gases liberated when wet. Do not reuse container; rinse thoroughly with water and discard. **Antidote:** Drink milk of magnesia, vegetable oil or whites of eggs and call physician.

Treated pool water should not be discharged directly into lakes, streams or ponds.
