

NEW FIRE RESISTANT

Tabex Chlorine Concentrate II Granular

- Features a dry chlorine that dissolves immediately.
- A most effective germicide and algaecide.
- Will not cause cloudiness in water.
- Will not add scale forming minerals in the water.
- Will maintain your pool crystal clear.
- Flame-resistant.

The control of pH is greatly simplified using Tabex Chlorine Concentrate II Granular. In fact, you will require from 1/2 to 1/4 the amount of acid usually applied. Tabex Chlorine provides a more stable form of chlorine for easier maintenance of an effective chlorine residual in pool water for disinfecting action. It requires less storage space and maintains constant strength regardless of storage time. It is economical to use in that, after the pool is stabilized, you will need to apply Tabex Chlorine less often.

INSTRUCTIONS:

When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 1.5 ppm available chlorine. To accomplish this, add 9 oz. Tabex Chlorine Concentrate II Granular per 10,000 gallons of pool water. The next morning, add Tabex Conditioner at the rate of 1 lb. per 4,000 gallons to stabilize the pool.

Tabex Chlorine should be added daily or as needed at the rate of 1 1/4 to 2 1/2 oz. per day per 10,000 gallons of pool water to maintain a chlorine residual at all times of 1.0 ppm to 1.5 ppm as determined by a suitable test kit. The pH should be maintained between 7.2 and 7.8.

Superchlorinate (shock treatment) every week during hot weather or after heavy rains. Less frequent shock treatments may be made during cool weather. For the shock treatment, add 9 oz. of Tabex Chlorine per 10,000 gallons of pool water. Swimmers should not be permitted in the pool after the shock treatment until the chlorine residual has reached the 1.0 ppm to 1.5 ppm range.

Keep in mind that a slight flexibility must be maintained in the event of heavy accumulations of dust and dirt caused by storms or super heavy bathing loads which require additional dosages as needed to maintain the chlorine residual between 1.0 ppm and 1.5 ppm.

More fun/less work for pool owners

DANGER: KEEP OUT OF REACH OF CHILDREN. See other precautions and first aid on side panel.

Active Ingredient:
 Sodium Dichloro-s-Triazinetrione Dihydrate 100%
 Net Weight 5 lbs. (Available Chlorine 56%)

Danger:

KEEP OUT OF REACH OF

Corrosive, causes eye damage. Do not get in eyes or cause skin, nose and throat irritation. Wear safety clothing when handling. May be fatal if swallowed.

First Aid: In case of personal contact remove excess with cold water for at least 15 minutes. For eyes gaseous contaminated clothing before reuse.

If swallowed, feed gruel or cooked cereal followed by Physician immediately.

Strong oxidizing agent. Moisture contamination may produce chlorine-containing gases. Decomposes at 350-475° F. In case of decomposition, if possible isolate container. Flood with large volume of water if necessary.

Mix only with water. Do not mix with other pool cleaning utensils. Store in a cool, dry place. Keep closed.

Do not reuse container. Rinse empty container thoroughly.

This product is toxic to fish. Treated pool effluent will drain into lakes, streams, ponds or public waterways. Clean up by cleaning of equipment or disposal of wastes.

Apply this product only as specified on this label.
