ED UNDER NO. 9087-6 SUBJECT
TO ATTACHED COMMENTS.

9087-6

DIRECTIONS:

Algae Out contains a chelated copper sulfate. Algae Out is formulated for immediate anti-algae shock treatment as well as for extended relief from algae. It is not intended to take the place of regular maintenance of chlorine residuals and regular maintenance of algaecide levels. Use Algae Out as follows:

1. Adjust pool water pH to 7.2-7.8 range with a total water alkalinity range of 100 to 150 ppm each as determined by suitable test kits.
2. To control pool water algae, distribute 3 pounds over water surface for each 20,000 gallons of pool water (for 10,000 gallons, use 1/2 jar, etc.) This will raise pool water chlorine residual to 4 ppm for immediate anti-algae shock treatment and add 1 ppm of chelated copper sulfate for extended algae relief.
3. For best results, use Tabex Algae Out in evening after pool use is discontinued for the day. Before using pool again, allow chlorine residual to return to 1.0-1.5 ppm level as determined by use of a suitable chlorine test kit.
4. If algae persists, repeat dosage.

LABORATORIES
NEW YORK, N.Y.

MORE FUN / LESS WORK FOR POOL OWNERS

DANGER: KEEP OUT OF REACH OF CHILDREN. See other precautions and antidote on side panel.

Active Ingredients:	
Sodium Dichloro-s-Triazinetrione	36.7%
Copper Sulfate	8.7%
Inert Ingredient	54.6%
Available Chlorine	22.0%

BUFFERED ALGAECIDE—WILL NOT CONSUME POOL CHLORINE RESIDUALS

Tabex Algae Out will give rapid and extended relief from most forms of pool water algae. Unlike many other algaecides, Algae Out will not combine with and neutralize chlorine residuals already in the pool. This means that Tabex Algae Out and chlorine in your pool will work together rather than destroying each other. In addition, Tabex Algae Out will not upset the pH balance of your pool: it is buffered. For free bulletins on pool water chemistry, write the manufacturer, Dept. E, giving pool size, gallonage, type (for example: gunite or vinyl, in-ground or above-ground).

DANGER: May cause eye damage. Harmful if taken internally. May cause burns on wet skin. Rinse hands after handling. Strong oxidizer: Do not mix with any other chemical—mix only with water. Do not get into eyes, rinse with cold water, call physician. Avoid inhalation of dust and vapors. Keep away from organic matter (may cause fire), heat or open flame. Keep dry—chlorine and equally toxic gases liberated when wet. Do not reuse container. Destroy when empty.

Antidote: Drink milk of magnesia, vegetable oil or whites of eggs and call physician. This product is toxic to fish. Treated pool water should not be discharged where it will drain into lakes, streams, ponds or public water.

Net Weight: 3 lbs. EPA Reg. No. 9087-6 Product No. 467
