DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING

Directions for use of this product are given on the label. The following information is provided for your reference. It is not intended to replace the label. The label is the primary source of information for the user of this product.

For information on the use of this product, please refer to the label. The following information is provided for your reference.

A. Add the product to the water in the container. The product will dissolve rapidly and the water will become clear.

B. Stir the water with a spoon or stick. The water will become clear and the product will be dissolved.

C. Stir the water with a spoon or stick. The water will become clear and the product will be dissolved.

Do not use this product in water that is less than 50°F (10°C). The product will not dissolve in water that is less than 50°F (10°C). The product will not dissolve in water that is less than 50°F (10°C).

B. Measure the amount of product to be added to the water. The amount of product to be added to the water is given on the label. The amount of product to be added to the water is given on the label.

Do not use this product in water that is less than 50°F (10°C). The product will not dissolve in water that is less than 50°F (10°C). The product will not dissolve in water that is less than 50°F (10°C).

Danger: Highly flammable liquid and vapor. May be fatal if swallowed and absorbed through skin. Causes severe eye irritation and damage. Causes respiratory irritation. Causes skin irritation. Causes allergic skin reaction. Harmful to aquatic life with long lasting effects.

Environmental Hazards: This product is highly flammable and may contribute to air pollution. It is also highly toxic to aquatic life and may cause long-term adverse effects in the environment.

Physical and Chemical Hazards: This product is highly flammable and may contribute to air pollution. It is also highly toxic to aquatic life and may cause long-term adverse effects in the environment.

Practical Treatment (First Aid): If swallowed, do not induce vomiting. If inhaled, move to fresh air. If on skin, wash with water. If in eyes, flush with water for 15 minutes.

Storage and Disposal: Store in a cool, dry place away from heat and open flames. Dispose of in accordance with local regulations.

MORE FUN / LESS WORK FOR POOL OWNER:

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

These unique, completely soluble sticks are an extremely concentrated form of swimming pool sanitizing agent. They are designed to dissolve slowly and at a uniform rate—to give relief from the nuisance of frequent hand feeding of granular or liquid chlorination. For the ultimate convenience of continuous, automatically-fed chlorination, try our fully automatic feeder.

For Continuous Daily Chlorination: Before the first use of these stabilized, slow-dissolving sticks for continuous daily chlorination, be sure to take the following steps:

A. Adjust the pool water pH value to between 7.2pH and 7.8pH as determined by a suitable test kit, and adjust the alkalinity to at least 100 ppm.

B. Stabilize the pool water to at least 40 ppm by the addition of conditioner as directed on container label. Thereafter, regular use of these stabilized, slow-dissolving sticks for daily chlorination will provide any needed makeup conditioner.

C. Superchlorinate (shock treat) the pool water to 4 ppm residual chlorine level with our fast-dissolving tablets as directed on container label.

Once the pool water has been read, "ready" by following A, B and C, use these stabilized, slow-dissolving sticks to maintain the residual chlorine level at a safe and efficient 1.0 ppm to 1.5 ppm of available chlorine at all times, as determined by the daily or more frequent use of a suitable test kit.

By means of a feeder, float device, or skimmer dispenser, immerse one slow-dissolving stick—or as many of them as needed to continuously maintain the safe available chlorine level—for each 5,000 to 10,000 gallons of pool water. Or put the sticks directly into the skimmer. (But never put sticks directly into the swimming pool because discoloration of the pool liner or finish could occur.)

Superchlorinate (shock treat) the pool water at least twice each month during hot weather and peak bather loads. Failure to superchlorinate regularly could result in the growth of pool water algae.

Danger: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

Environmental Hazards: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

Physical and Chemical Hazards: Strong Oxidizing Agent. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well-ventilated area. Flood with large volumes of water, if necessary.

Practical Treatment (First Aid): If swallowed, feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin, brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes, flush with cold water for at least 15 minutes. Get medical attention.

Storage and Disposal: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.
