

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

- Severe algal growth such as Black Algae is resistant to normal chlorine levels and most liquid algaecides. Tabex Black Algae Eliminator is an extremely powerful Algaecide and Bactericide formulated specifically to kill problem algal growth.
- Before first use of this product, turn off your pool pump and any automatic pool cleaner. Allow the water to remain undisturbed for a minimum of 4 hours (This allows the water to stop moving).
- Using care to prevent the product from contacting your skin, broadcast Tabex Black Algae Eliminator around the pool especially in the area of heavy growth. The slow dissolving characteristic of Black Algae Eliminator allows concentrated chlorine to attack the growth and destroy it. DO NOT USE POOL for at least 24 hours.
- The next morning after application, brush the growth and turn pump on. If growth persists a second application may be required.
- The contents of this container are sufficient to Superchlorinate and kill algae in up to a 40,000 gallon pool. Use the following chart to determine 4 ppm Superchlorination level required.

POOL VOLUME	TABEX BLACK ALGAE ELIMINATOR
5,000 gallons	4 ounces
7,500 gallons	6 ounces
15,000 gallons	12 ounces
20,000 gallons	16 ounces (1/2 of container)
30,000 gallons	24 ounces (3/4 of container)
40,000 gallons	32 ounces (entire jar)

- It is suggested that before first use of this product the algae growth be brushed.
- UNDER NO CIRCUMSTANCE SHOULD THE POOL BE USED DURING TREATMENT with Tabex Black Algae Eliminator. This product should not be used in vinyl or painted pools as discoloration of the finish may occur. Frequent uses of this product may damage pool finish consult your Tabex Pool Care Professional.

Danger: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

Environmental Hazards: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

Physical and Chemical Hazards: Strong Oxidizing Agent. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well-ventilated area. Flood with large volumes of water, if necessary.

Practical Treatment (First Aid): If swallowed, feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin, brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes, flush with cold water for at least 15 minutes. Get medical attention.

Storage and Disposal: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area or bury in a safe place.
