

## DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

- A) Superchlorination (Shock Treatment) of swimming pools is required regularly to oxidize (burns-out) organic contaminants known as combined chlorines (chloramines). Regular superchlorination restores free chlorine reading as well as sparkling water.
- B) Add these Large Super Shock Tablets directly into the skimmer while pump is operating. NEVER DIRECTLY INTO THE POOL AS DISCOLORATION OF THE POOL FINISH MAY OCCUR. Large Super Shock Tablets dissolve immediately to produce a free chlorine residual of 4 ppm. Use one Large Super Shock Tablet for each 5,000 gallons of pool water.
- C) Superchlorination (Shock Treatment) should be performed in the late afternoon or early evening hours. Swimming can be resumed the following morning.

### FOR CONTINUOUS DAILY CHLORINATION-

- A) Tabex Large Super Shock tablets can also be used for daily chlorination of swimming pools. Add one tablet daily or every other day through an automatic chlorinator, float device or skimmer dispenser for each 10,000 to 20,000 gallons of pool water to maintain a free chlorine residual of 1.0-1.5 ppm as determined by a suitable free chlorine test kit.
- B) NEVER ADD THIS PRODUCT DIRECTLY INTO THE POOL AS DISCOLORATION OF THE POOL FINISH MAY OCCUR.

**Danger:** Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

**Environmental Hazards:** This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

**Physical and Chemical Hazards:** Strong Oxidizing Agent. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well-ventilated area. Flood with large volumes of water, if necessary.

**Practical Treatment (First Aid):** If swallowed, feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin, brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes, flush with cold water for at least 15 minutes. Get medical attention.

**Storage and Disposal:** Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area or bury in a safe place.

CONTENTS: 15-5/8 oz. tablets

NET WEIGHT: 5 pounds
