Active Ingredient:

Tri-chloro-s-triazinetriolone 95%

Inert Ingredients 5%

Available Chlorine 88.5%

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER IN-
CONSISTENT WITH ITS LABELING.

1. FOR CONTROL OF BACTERIA AND ALGAE (OUTDOORS) IN SPAS OPERATED
CONTINUOUSLY: Before bathing, test water pH, chlorine residual and alkalinity
using a suitable test kit. Adjust chlorine residual to 3.0 ppm. Maintain pH of water
between 7.2-7.8 and total alkalinity between 125 and 175 ppm with the addition of
Spa-care pH Stabilizer.

2. This product does not affect pH or alkalinity of water. One tablet (1/4 oz.) per
1000 gal. of water gives 3 ppm of chlorine. To use apply sufficient tablets to the
feeder to maintain the chlorine level at 1 to 3 ppm. Bathing can start when the
chlorine level is between 1 and 3 ppm.

3. Test often and keep chlorine residual above 1.0 ppm by adjusting output from
feeder to bather load.

4. Weekly, superchlorinate water to 5 or 6 ppm using SPA CARE CHLORINATING
GRANULES as recommended on the label directions. Usually 2 level tablespoons
per 1000 gal. of water gives 6 ppm chlorine. Draining and cleaning of spa is
recommended whenever the water becomes difficult to manage. Avoid use of pro-
ducts such as body lotion that consume chlorine.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swal-
lowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and
rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust.
Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into
lakes, streams, ponds, or public waters unless in accordance with an NPDES Per-
mit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT: Mix only with water. Use clean dry vessels. Do not
add this product to any dispensing device containing remnants of any other pro-
duct. Such use may cause a violent reaction leading to fire or explosion. Con-
tamination with moisture, organic matter, with generation of heat, liberation of
hazardous gases, and possible generation of fire and explosion. In case of con-
tamination or decomposition, do not reuse container. If possible isolate con-
tainer in open air or well ventilated area. Flood with large volumes of water, if
necessary.

PRACTICAL TREATMENT (FIRST AID): If swallowed: Feed bread soaked in milk,
followed by olive oil or cooking oil. Call a physician immediately. If on skin: Brush
off excess chemical and flush skin with cold water for at least 15 minutes. If irrita-
tion persists, get medical attention. If in eyes: Flush with cold water for at least
15 minutes. Get medical attention.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not
in use. Store in a cool dry, well ventilated area away from heat or open flame. In
case of decomposition isolate container, if possible, and flood with large amounts
of water to dissolve all material before discarding. Place in a trash collection or
dispose in approved landfill area, or bury in a safe place.
