Chlorinating

**See First Aid Statement and
Additional Precautions on Side Panels**

Active Ingredient	
Sodium dichloro-S-triazinetrione	99.5
Inert Ingredients	5
Available Chlorine 62%	

[illegible][illegible]

1. **Acid Rain:** Acid rain is a common environmental problem that can cause damage to buildings, crops, and aquatic life. It is caused by sulfur dioxide and nitrogen oxides released from factories and power plants. To reduce acid rain, we can use cleaner energy sources like wind and solar, and install scrubbers on smokestacks to remove pollutants before they are released into the air.

The first of these is the fact that the water is not only a source of energy but also a source of matter. The water is a source of energy because it is a source of heat. The water is a source of matter because it is a source of oxygen. The water is a source of energy because it is a source of heat. The water is a source of matter because it is a source of oxygen.
