DIRECTIONS FOR USE GENERAL CLASSIFICATION

If it is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Tabex A que Out Equid Concentrate is used to control the growth of aigue in swamming pools, exterior spas, whirlpools, and hot tabs. For maximom effectiveriess pools, spas whirlpools, and hot tubs containing heavy growth, aligue should be cleaned prior to using Tabex. Algae Out Liquid Concentrate.

For pools having just visible algae growth add an initial dose of 23.5 to 36.4 fluid ounces of Tubex. Algae Out Liquid Concentrate per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool add initially 12.8 to 23.5 fluid ounces of Tabex. Algae Out Liquid Concentrate per 10,000 gallons of water. Subsequent additions of 4.3 to 8.6 fluid ounces of Tabex. Algae Out Liquid Concentrate per 10,000 gallons of water should be made every 5 to 7 days after initial treatment for maintenance.

Spas, whirlpools, or hot tubs having just visible algae growth require an initial dose of 2 to 4 fluid ounces of Tabex Algae Out Liquid Concentrate per 1000 gallons of water. For treatment of a freshly cleaned and filled spa, whirlpool, or hot tub, add initially 1 to 2 fluid ounces of Tabex Algae Out Liquid Concentrate per 1,000 gallons of water. Subsequent ad ditions of 0.5 to 0.8 fluid ounces of Tabex Algae Out Liquid Concentrate should be made every 5 to 7 days after initial treatment for maintenance.

Tabex Algae Out Liquid Concentrate is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH. Tabex Algae Out Liquid Concentrate can be used in pools and spas treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Tabex Algae Out Liquid Concentrate with concentrated dry or liquid chlorine pro Jucts.
