- Tabex BLACK Algae Killer is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using BLACK Algae Killer.
- For pools having just visible algae growth add an initial dose of 11 to 17 fluid ounces of BLACK Algae Killer per 10,000 gallons of water and remove sorted algae debris by cleaning.
- For treatment of a freshly cleaned and filled pool add initial 6 to 11 fluid ounces of BLACK Algae Killer per 10,000 gallons of water.
- To maintain pools free of visible algae growth subsequent additions of 2 to 4 fluid ounces of BLACK Algae Killer per 10,000 gallons of water should be made every 5 to 7 days after the initial treatment.
- Tabex BLACK Algae Killer is compatible with those chemicals normally used to treat pools and effective at both acid and alkaline pH. BLACK Algae Killer can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However do not mix BLACK Algae Killer with concentrated dry or liquid chlorine products.

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes or clothing.

PRACTICAL TREATMENT (FIRST AID): If swallowed, promptly drink a large quantity of milk, egg white, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Permits may be required for discharges containing this pesticide into lakes, streams, ponds or public water. For guidance, contact the regional office of the Environmental Protection Agency.

STORAGE AND DISPOSAL

Keep container closed when not in use. Do not contaminate water, food, or feed by storage, disposal or cleaning of equipment. Do not reuse empty container. Triple rinse (or equivalent) and dispose of container in an incinerator or in an approved landfill, or bury in a safe place. Residue that cannot be used or reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies. Open dumping is prohibited.
