

NOTICE OF PESTICIDE:

☒ REGISTRATION
☐ REREGISTRATION

(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

1001 14th St., N.W.
Washington, D.C. 20004
Phone: 202-462-1111

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Very truly yours,
[Signature]

Enclosed are 50 copies of the label for the product registered under FIFRA sec. 2(b)(1) and similar products.

Also the phrase "EPA Reg. No. []" is printed on the label for the product for which registration is being requested.

Enclosed are 50 copies of your label for the product for which registration is being requested. The label is printed on 100% recycled paper.

The label is not to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Tab-Chem Chlorinating Granular will aid in the control of algae and bacterial slimes found in recirculating cooling tower waters. Tab-Chem Chlorinating Granular is designed to release chlorine rapidly enough to satisfy a system's chlorine demand and still provide residual available chlorine.

1. Heavily fouled towers should be given an initial manual cleaning. All systems should be cleaned regularly.
2. Tab-Chem Chlorinating Granular should be slug-fed to the system. The necessary dosage will depend upon the chlorine demand of the system but will normally range from 1/8 to 2 pounds per 1000 gallons of system water. Cleaner systems will generally require less treatment.

3. Repeat the dosage 2 to 3 times per week to maintain the proper treatment level.

Tab-Chem Chlorinating Granular

Water Treatment Microbiocide for

Building and Industrial Cooling Towers

DANGER: Keep out of reach of children. See other precautions and antidotes on side panel.

Active Ingredient:

Sodium dichloro-s triazinetrione.....99%

Inert Ingredient.....1%

Available Chlorine 60%

RIGHT PANEL

DANGER: Highly corrosive, causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with a NPDES permit. For guidance contact the regional office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible,

isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

PRACTICAL TREATMENT: If swallowed, feed bread soaked in milk followed by olive oil or cooking oil. Call a physician IMMEDIATELY. If on skin, brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes, flush with cold water for at least 15 minutes. Get medical attention.

STORAGE AND DISPOSAL: Keep product dry in a tightly closed container when not in use. Store in a cool, well ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Dispose of in an approved landfill or bury in a safe place.
