DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Tab-Chem Chlorination Tablets will aid in the control of algae and bacterial slimes found in recirculating cooling tower waters. Tab-Chem Chlorination Tablets are designed to dissolve slowly and at a uniform rate thereby eliminating the nuisance of frequent hand feeding of granular or liquid type biocides.

1. Heavily fouled towers should be given an initial manual cleaning. All systems should be cleaned regularly.
2. Tab-Chem Chlorination Tablets can be placed anywhere in the recirculating system. The necessary dosage will depend upon the chlorine demand of the system but will normally range from 1 to 15 tablets per 5,000 gallons of system water. Cleaner systems will require less treatment.

As the Tab-Chem Chlorination Tablets dissolve, additional tablets should be added to the system to maintain the proper treatment level.

Tab-Chem Chlorination Tablets
Water Treatment Microbiocide for
Building and Industrial Cooling Towers

Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended, for the pesticide
registered under EPA Reg. No.

9087-35

DANGER: Keep out of reach of children. See other precautions and antidotes on side panel.

Active Ingredient:

Trichloro-s-triazinetriene.....95%

Inert Ingredient.....5%

Available Chlorine 86.5%

RIGHT PANEL

DANGER: Highly corrosive, causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact the regional office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any

other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

PRACTICAL TREATMENT: If swallowed, feed bread soaked in milk followed by olive oil or cooking oil. Call a physician IMMEDIATELY. If on skin, brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes, flush with cold water for at least 15 minutes. Get medical attention.

STORAGE AND DISPOSAL: Keep product dry in a tightly closed container when not in use. Store in a cool, well ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Dispose of in an approved landfill or bury in a safe place.
