

EPA Form 8570-6 (Rev. 5-76)

PREVIOUS EDITION MAY BE USED UNTIL SUPPLY IS EXHAUSTED.

**Tab-Chem 30**

NOV 26 1962

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
as amended, for the purpose  
regulated under EPA Reg. 40

**ACTIVE INGREDIENT:**

|                                        |               |
|----------------------------------------|---------------|
| Potassium diethyldithiocarbamate ..... | 10.5 %        |
| <b>INERT INGREDIENTS .....</b>         | <b>87.5 %</b> |

This product contains 1.1 lb. of active ingredient per gallon and weighs 8.77 lb. per gallon.

**KEEP OUT OF REACH OF CHILDREN  
WARNING**

**PRECAUTIONARY STATEMENTS**  
**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**WARNING:** Causes eye damage and skin irritation. May be harmful if swallowed. Do not get in eyes, on skin, or on clothing. Avoid contamination of food, water, glasses or food chains and rubber gloves when handling. Wash thoroughly after handling.

[illegible]

**DISPOSABLE FIREARMS:** This privilege is that to sell. Do not dispose of weapons into bars, streets, parks, or public places, unless in accordance with a BFOES permit. For questions, contact your Regional Office of the Environmental Protection Agency.

**DIRECTIONS FOR USE**  
**GENERAL CLASSIFICATION**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Tab-Chem 30 is used in industrial and/or commercial recirculating cooling tower systems and industrial air-washing systems to control microbiological slime. Prior to the use of Tab-Chem 30 on industrial and/or commercial recirculating cooling tower systems, systems should be cleaned to remove sludge growth, microbiological slime, and other deposits. Then make an initial slug addition of 9.5 to 15.2 g. or of Tab-Chem 30 per 1000 gal. of water to provide 80 to 120 ppm of Tab-Chem 30 based on total weight of water in the system. Repeat initial dosage until control is evident. Make subsequent slug addition of 4.7 to 15.2 g. or of Tab-Chem 30 per 1000 gal. of water ( 40 to 120 ppm Tab-Chem 30 ) every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of recirculating cooling tower systems.

Tab Chem 30 is used in industrial air-washing systems which maintain effective mist-eliminating components. Prior to its use, systems should be cleaned to remove bacterial slime and other deposits. An initial slug dose of 22.2 to 28.4 g. or of Tab-Chem 30 per 1000 gal. of water is recommended. Repeat initial dosage until control is evident. Subsequent slug additions of 16.5 to 28.4 g. or of Tab-Chem 30 per 1000 gallons of water should be employed every 1 to 2 days, or as needed. The frequency of addition depends upon the relative amount of bio-slime and severity of the bacterial problem. Slug additions may be made to the in-let or the water collection trays of the airwash system.

## STORAGE AND DISPOSAL

**PESTICIDE DISPOSAL** Pesticides, spray markers, or materials that cannot be used or otherwise repackaged should be disposed of in a method approved for pesticides or burning in a safe clean area from water supplies.

### CONTAINER DISPOSAL

**METAL** Tools used for excavating and often for recycling, reconditioning, or disposal in an approved landfill or bury in a safe place. Components that 30 gallons should be removed before offering for reconditioning.

**PLASTIC** Components that 30 gallons may not be removed but should be made ready and disposed of in an incinerator or landfill approved for petroleum components or buried in a safe place. Components that 30 gallons and up to be removed and offering for reconditioning or made ready for excavators and offering for recycling, reconditioning, or disposal in an approved landfill or buried in a safe place.

GENERAL Comment: Funding Source is Local Municipal Authority for approved elementary schools only.

Tab-Chem 30

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
as amended, for the pesticide  
registered under EPA Reg. No.

7087-26

**ACTIVE INGREDIENT:**

Potassium dimethyldithiocarbamate ..... 12.5 %

**INERT INGREDIENTS** ..... 87.5 %

This product contains 1.1 lb. of active ingredient per gallon and  
weighs 8.77 lb. per gallon.

**KEEP OUT OF REACH OF CHILDREN  
WARNING**

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**WARNING:** Causes eye damage and skin irritation. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Avoid contamination of food. Wear goggles or face shield and rubber gloves when handling. Wash thoroughly after handling.

**STATEMENT OF PRACTICAL TREATMENT:** In case of skin contact, wash with plenty of soap and water. Remove contaminated clothing and wash before reuse. If product gets in the eyes, flush immediately with copious amounts of clean, cool water for at least 15 minutes. Get medical attention immediately. If product is swallowed, call a physician immediately. If patient is conscious, induce vomiting by stroking or tickling the patient's throat or far back on patient's tongue. Emetics such as 2 teaspoonful (10 mL) of ipecac syrup or 1 teaspoonful (5 mL) of dry mustard in warm water to form a paste or even soap in warm water can be used. Repeat until vomit fluid is clear. Then have patient drink plenty of milk, gelatin solution, beaten egg whites, flour and water, or other nonoily demulcent. Never induce vomiting or give anything by mouth to an unconscious person.

Note to physician: Probable mucosal damage may contraindicate gastric lavage.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish. Do not discharge treated effluent into lakes, streams, ponds, or public waters unless in accordance with a NPDES permit. For guidance, contact your Regional Office of the Environmental Protection Agency.

GENERAL CLASSIFICATION**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Tab-Chem 30 is used in industrial and/or recirculating cooling tower systems and industrial air-washing systems to remove microbiological slime. Prior to the use of Tab-Chem 30, industrial and/or commercial recirculating cooling tower systems, systems cleaned to remove algal growth, microbiological slime, and other deposits. Tab-Chem 30 initial slug addition of 9.5 to 14.2 fl. oz. of Tab-Chem 30 per 1000 gal. of water to provide 80 to 120 ppm of Tab-Chem 30, based on total weight of water in the system. Repeat until control is evident. Make subsequent slug addition of 4.7 to 14.2 fl. oz. of Tab-Chem 30 per 1000 gal. of water (40 ppm Tab-Chem 30) every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of recirculating tower systems.

Tab-Chem 30 is used in industrial air-washing systems which maintain effective mist-eliminating components. Prior to its use, systems should be cleaned to remove bacterial slime and other deposits. An initial slug dose of 28.4 fl. oz. of Tab-Chem 30 per 1000 gallons of water is recommended. Repeat initial dosage until control is evident. Subsequent slug additions of 16.5 to 28.4 fl. oz. of Tab-Chem 30 per 1000 gallons of water should be employed every 1 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and severity of the bacterial problem. Slug additions may be made to the sump or the water collection trays of the system.

**STORAGE AND DISPOSAL**

**PROHIBITIONS:** Do not contaminate water, food, or feed by storage or disposal. Open dumpsites are prohibited.

**PESTICIDE DISPOSAL:** Pesticide, spray mixture, or residue that cannot be used or chemically destroyed should be disposed of in a landfill approved for pesticides, or buried in a safe place away from water.

**CONTAINER DISPOSAL:**

**METAL** Triple rinse (or equivalent) and offer for recycling, reconditioning, or disposal in an approved landfill.

**PLASTIC** Containers under 30 gallons must not be reused but should be triple rinsed and disposed of in an approved landfill approved for pesticide containers or buried in a safe place. Containers over 30 gallons should be triple rinsed (or equivalent) and offered for recycling, reconditioning, or disposal in an approved landfill or buried in a safe place.

**GENERAL** Consult Federal, State, or Local disposal authorities for approved alternative procedures.
