NET WEIGHTS:

Total 99.97
100.00

GENERAL DIRECTIONS: Place bait in shallow containers in dry locations where rats and mice feed water is not available. It is desirable to place baits along walls and corners and in concealed locations where rats and mice can feed undisturbed. Contaminated or spoiled baits should be replaced promptly. Baiting should continue until all signs of feeding have stopped. Where a natural source of infestation is present (nearly always, for example) permanent bait stations should be established and replenished as needed.

BAIT SHOULD BE PLACED IN THE MOUTH OF THE ANIMAL AND SHOULD BE KEPT AWAY FROM CHILDREN AND DOMESTIC ANIMALS.

FOR RAT BAITING: The bait should be placed in shallow containers in dry locations where rats and mice can feed undisturbed. Contaminated or spoiled baits should be replaced promptly.

FOR MOUSE BAITING: The bait should be placed in shallow containers in dry locations where mice can feed undisturbed. Contaminated or spoiled baits should be replaced promptly.

NOTE: Do not use this bait in areas where it is not intended to be used. Do not use in areas where it is not intended to be used. Do not use in areas where it is not intended to be used.
