

DIRECTIONS FOR USE

Recommended for dairy barns, poultry houses, livestock barns and pens. Kills both resistant and non-resistant flies. Can be used as a liquid or dry bait. Either use will give fast reduction of fly populations. Apply the bait so that the treated areas are out of reach of animals and poultry.

DRY BAIT

Scatter Wayne Fly Killer Sugar Bait at the rate of $\frac{1}{4}$ pound per 1,000 square feet in and around areas where flies are seen. Apply every 2-3 days until fly population is under control and then apply as needed.

LIQUID BAIT

Dissolve 1 pound of Wayne Fly Killer Sugar Bait in 1 gallon of water. Sprinkle or spray floor areas, window sills, walls or other areas where flies are seen at the rate of 1 gallon of bait solution per 1000 square feet. Repeat daily until flies are under control and then apply as needed.

CAUTION

Harmful if swallowed, inhaled, or absorbed through the skin. If swallowed, induce vomiting and get medical attention. Atropine is antidotal. Avoid breathing of dust and contact with skin. Wash hands after use before eating or smoking. Avoid contamination of feed or foodstuffs. Keep out of reach of children, poultry and domestic animals. Do not use inside homes. Do not contaminate milk or milking equipment. Application in dairy barns should be made after milking.

This product is toxic to fish and wildlife. Birds feeding on treated areas may be killed. Keep out of any body of water. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label. Do not reuse empty container. Destroy it by burying with waste or burning. Stay away from smoke or fumes.
