# ALL-SOLUBLE CHLORINE SANITIZER SANI-CHLOR

## DIRECTIONS: DAIRY, BEVERAGE, FOOD PROCESSING EQUIPMENT

1. Wash with a detergent or other use.  
 2. Rinse with clean water.  
 3. Wash with a good standard cleaning compound.  
 4. Rinse with clean water.  
 5. Sanitize with a standard sanitizing solution.

For sanitizing dairy and beverage processing equipment, wash with Southland's Sani-Chlor at a concentration of 100 ppm (100 parts per million) in each 12 gallons of water (100 ppm = 100 mg/liter). Test for chlorine with a chlorine tester. When solution strength is 100 ppm, it is standard.

For sanitizing food processing equipment, use 250 ppm (iv. cl. of Southland's Sani-Chlor) in each 12 gallons of water (250 ppm = 250 mg/liter).

For sanitizing food processing equipment, use 250 ppm (iv. cl. of Southland's Sani-Chlor) in each 12 gallons of water (250 ppm = 250 mg/liter).

## DIRECTIONS: GLASSES, DISHES, UTENSILS

1. Scrape and pre-flush articles to be sanitized.
2. Wash in clean water using the standard cleaning compound.
3. Rinse in clean running water.
4. Sanitize - Southland's Sani-Chlor at a concentration of 100 ppm in each 12 gallons of water (100 ppm = 100 mg/liter) for at least 2 minutes or for a longer period as required by the sanitary code. Test periodically to insure that solution depreciates to 100 ppm. Drain on drain board.

### CAUTION MAY BE HARMFUL IF SWALLOWED

Undiluted solution may cause skin irritation. Avoid contact with skin and eyes. In case of contact flush with plenty of water. If irritation persists get medical attention. Avoid contact with food.

**KEEP OUT OF REACH OF CHILDREN**
