

nozzle towards nests, crevices or holes where infestation or insects are known to be inside. Press valve all the way down until area is saturated with contents. Also spray around this area until completely wet with Wasp Killer. This treated surface will have a residual killing action and prevents reinfestation for 2 to 4 weeks. In the event the insecticide film becomes ineffective due to rain or other causes repeat treatment.

CAUTION: Avoid breathing spray mist. Harmful if swallowed. In case of contact with skin, wash with soap and water. **KEEP OUT OF REACH OF CHILDREN.** Do not use in homes. Not for use in poultry houses. Do not puncture container or disperse contents in incinerator. Do not store in direct sunlight or where temperature exceeds 120° F.

SPECIFICATIONS OF LIQUID CONCENTRATE
 FLASH POINT / NONE FIREPOINT / NONE
 DIELECTRIC (BY METER RELAY 29.6)

Active Ingredients: 16.8
 Pyrethrins 1.000
 Chlordane 1.000
 Pine Oil 2.800
 Petroleum Distillate 11.950

Inert Ingredients: 83.2
 Methylene Chloride 6.000
 Tetrachlorethylene 2.000
 Dibenzodifurmethane 17.600
 Monofluorotrichloroethane 11.600
 Consists of 1,2,2,4-tetrafluoroethane, 1,1,1,2-tetrafluoroethane, and other fluorinated compounds.
