Insecticide-Rodenticide Branch
Registration Division (H7505C)

Enclosure

Flea, Mosquitoes, Bats: Close room and discharge mist vigorously in all parts of room, using 1 to 2 ounces for each 100 cubic feet of space. Leave room closed for at least ten minutes. Do not remain in closed treated area. Ventilate when treatment is completed. Sweep up and destroy fallen insects. Repeat as needed.

Flies (Infecting Premises): Remove and destroy animals' bedding and spray sleeping quarters freely, forcing the spray into all cracks in the floor and about the room. Repeat when reinfested.

For household use, this product must be applied as fine mist.

Roaches, Waterbugs: Apply in all cracks and crevices in woodwork underneath sinks, dark places behind pipes and in all places where roaches and waterbugs infest. Contacting as many insects as possible. Repeat the operation as often as necessary.

Clothes Moths, Carpet Beetles: Spray all articles to be protected giving particular attention to folds and seams. Interior surfaces should be sprayed regularly. The treatment should be repeated every 30 days unless the articles are stored in moth tight containers.

Grain Weevils, Cadell's Flour Beetles, Grain Mites (Accessible Stages) and Curculionids (Adults) are the most common pests of stored grain. They are all found in the same places and are all found in the same quantities. They are all found in the same places and are all found in the same quantities. They are all found in the same places and are all found in the same quantities.
