

[9143-51]

FOR CONTROL OF FLIES AND MOSQUITOES IN ROOMS, BUILDINGS, OFFICES, WAREHOUSES AND SIMILAR ENVIRONMENTS.

HOW TO OPERATE

This dispenser is sealed for storage and shipping purposes. To break seal and make ready to use, press down firmly on the plastic button until a spray is obtained.

DIRECTIONS FOR USE:

If possible, close space to be treated. Release 3 feet from any surface, holding the dispenser above the head. Moving the dispenser about while spraying aids in dispersion. Dispense only for time indicated.

USE SPARINGLY. Seven seconds of spraying is ample for each 1,000 cubic feet (10 feet by 10 feet by 10 feet). It is not necessary to spray directly on insects but merely spray into the air since the aerosol will disperse throughout the enclosed space.

Leave windows and doors closed after treatment for about 15 minutes. Do not remain in closed treated areas. Ventilate treated area upon return.

WARNING

Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperature above 130°F may cause bursting. Never throw container into fire or incinerator.

CAUTION

Keep out of reach of children. Avoid inhaling of aerosol mist. Never spray directly on plastics.

Food should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when the facility is not in operation. Remove pets, birds and cover fish aquariums before spraying.

ACTIVE INGREDIENTS: 15.00%

Pyrethrins	0.6%
Technical Piperonyl Butoxide	1.4%
Petroleum Distillate	13.0%

INERT INGREDIENTS: 85.00%

Dichlorodifluoromethane	42.5%
Trichloromonofluoromethane	42.5%
	100.0%

Equivalent to 1.12% (butylcavityl) (6 propylpiperonyl) ether and 28% other related compounds
