PLANT INSECTICIDE  
DIVISION  
WASHINGTON, D.C.

**Upjohn**

**FOR VETERINARY USE  
IN HORSES ONLY**

An aid in the elimination of certain important internal parasites in horses and ponies

Shake well before using

Protect from freezing

**Caution:** Keep out of reach of children

**Caution:** Federal law (U.S.A.) prohibits this drug to sale by retail outlets without a license

The Upjohn Company • K-1

**Caution:** Do not administer to horses or foals that are affected or were recently affected with colic, diarrhea, or serious infectious diseases. As with most anthelmintic, drastic cathartics or other gastrointestinal irritants should not be administered in conjunction with Parvex. Animals in poor nutrition or heavily parasitized should be given one half (1/2) the recommended dose and treated again in two to three weeks. Should side effects occur, appropriate supportive treatment should be given, such as in the form of Solu-Delta-Cortef® (prednisolone sodium succinate), Predefin® (9-fluoroprednisolone acetate), Delta-Cortef® (prednisolone), Depo-Cortel® (methylprednisolone acetate) or intravenous glucose.

**CONTRAINDICATED IN DEBILITATED  
OR ANEMIC ANIMALS**
