POOL CHLORINE CONCENTRATE

- . Does not deposit scale on piping or filtering equipment.
- . Constitutes a **Buffering** to assist in correcting high and low pH.
- . Releases chlorine safely throughout the day.

POOL CHLORINE CONCENTRATE

Sun Chlorine Concentrate is a fast dissolving granular, formulated to release chlorine safely throughout the day. It is recommended that it be added directly to the pool water. Recommended dosage: 2 oz. per 10,000 gallons of pool water every day or as needed to maintain a chlorine residual of 0.6 to 1.0 PPM as determined by a test kit.

1. **San Chlorine Concentrate**

1. **San Chlorine Concentrate** (San Chlorine Co.) is 1% available chlorine. 1 lb. per gal. is 100,000 ppm. This is very high and in beginning of the pool season. San Chlorine Concentrate needs any DIF by adding to it reduces the effect of sunlight on the chlorine concentrate, and enables you to maintain a chlorine residual longer.
2. To prevent the growth of algae, superchlorinate at the start of the season, then once every two weeks with 1 gallon per 10,000 gallons of San Chlorine, (10 to 15 lbs. of 100,000 ppm. concentrate,) or an equivalent of 10 to 15 lbs. of 100,000 ppm. San Chlorine Concentrate. Add the liquid slowly by walking around the edge of the pool, spreading it over the water. Add 10 to 15 lbs. of 100,000 ppm. San Chlorine Concentrate directly into pool water. Superchlorinate when the water is in the swimmer's pool. After swimming, maintain a chlorine residual has dropped to 1.0 ppm.
3. Adjust pH to 7.4 to 7.6. If pH is above 7.6, add SUI-100. If pH is below 7.4, add SUI-100.

San Chlorine Concentrate is a white, granular, 100% available chlorine. It is very strong and very effective. It is added directly to the pool water. Add 10 to 15 lbs. of 100,000 ppm. San Chlorine Concentrate or only 10 to 15 lbs. of 100,000 ppm. San Chlorine Concentrate to 10,000 gallons of water. Maintain a chlorine residual of 1.0 to 1.5 ppm. **test kit.**
