NEW FIRE RESISTANT

"100"

CONCENTRATED POOL CHLORINE

- Features a dry chlorine that dissolves immediately.
- A most effective germicide and algacide.
- Will not cause cloudiness in water.
- Will not add scale forming minerals in the water.
- Will maintain your pool crystal clear.
- Flame – resistant.

The control of pH is greatly simplified using Sun "100" concentrated Pool Chlorine. In fact, you will require from 1/2 to 1/4 times the amount of acid usually applied. Sun "100" concentrated Pool Chlorine provides a more stable form of chlorine for easier maintenance of an effective chlorine residual in pool water for disinfecting action. It requires less storage space and maintains constant strength regardless of storage time. It is economical to use in that, after the pool is stabilized, you will need to apply Sun "100" concentrated Pool Chlorine less often.

This product is toxic to fish. Treated pool effluent water should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes.

Apply this product only as specified on this label.

EPA Reg. No. 9157 – 23

**NEW FIRE RESISTANT
CONCENTRATED
POOL CHLORINE**

GRANULAR CHLORINE NET WT. 5 LBS.

ACTIVE INGREDIENT	
SODIUM DICHLORO-S-TRIAZINETRIONE DIHYDRATE	100%
AVAILABLE CHLORINE	56%

DANGER

KEEP OUT OF REACH OF CHILDREN

INS'

When starting up a new pool and to establish a chlorine residual. To accomplish this Chlorine per 1,000 gallons cyanuric acid at the rate of 4

Sun "100" concentrated chlorine needed at the rate of 1/2 to maintain a chlorine residual determined by a suitable test 7.2 and 7.6.

A shock treatment should be after heavy rains. Less frequent weather. For the shock treatment Pool Chlorine per 1,000 gallons permitted in the pool after it has reached the 1.0 ppm to 1

Keep in mind that a slight heavy accumulations of dust bathing loads which require chlorine residual between 1.0

KEEP OUT

Corrosive Causes eye damage breathe dust. May cause skin goggles, dust respirator and fatal if swallowed. May cause Strong oxidizing agent. Irritant and hazardous chlorine-containing liberation of harmful gases. container in open air or water if necessary.

Mix only with water. Do not dry clean measuring utensils not being used.

F

In case of personal contact with cold water for at least 15 minutes. Clean contaminated clothing. If swallowed, feed gruel or cooking oil. Call a Physician.

Do not reuse container. Rinse and discard.
