SOLAR-CLOR

- Does not deposit scale on piping or filtering equipment.
- Constitutes a buffering to assist in correcting high and low pH.
- Releases Chlorine throughout the day.

WARNING

Avoid breathing dust. Avoid contact with skin and eyes. In case of contact with skin or eyes, flush with water for 15 minutes. For eyes, get medical attention. Clean contaminated clothing before reuse.

Strong oxidizing agent. Do not mix with other chemicals. Keep container tightly closed when not in use. Protect from moisture contamination. Keep away from heat, fire, combustible material, and organic matter. Dust may be harmful if inhaled.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

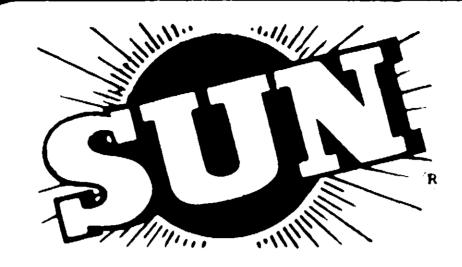

FIRST AID

EXTERNALLY or in eyes — immediately flush with cold water.

INTERNALLY — Drink milk or mucilage, followed by cooking oil. Call a physician.

DO NOT discharge effluent into lakes, streams or ponds.

DO NOT reuse container — Rinse empty container thoroughly with water before discarding.

DIRECTIONS

SUN SOLAR-CLOR is a fast dissolving granular product, formulated to release chlorine throughout the day. It is recommended that it be added directly to the pool water.

RECOMMENDED DOSAGE

Initially, follow directions under 'Preparing your pool'. After this initial period, add 1 oz. per 3,000 gallons of water daily or as needed to maintain 1.0 to 1.5 ppm residual chlorine as determined by a test kit. Chlorine content of the pool should be checked at regular intervals, especially during periods of extreme heat or heavy bather loads.

PREPARING YOUR POOL

Add SUN conditioner (Cyanuric Acid) slowly through the skimmer at a rate of 1 lb. per 5,000 gallons of water. Conditioning is not necessary, BUT by doing so the effects of sunlight on chlorine level are reduced, allowing you to maintain a chlorine residual longer. This is done only once, at the beginning of the pool season. To prevent the growth of algae, superchlorinate at the start of the season, then once every two weeks with 1 gallon Sun Concentrated Liquid Chlorine or an additional 7 oz. per 10,000 gallons of SUN SOLAR-CLOR. Either the liquid or SOLAR-CLOR should be added directly to the pool, distributing it throughout. Resume swimming when the chlorine residual has dropped to 4.5 ppm. Maintain a pH level of 7.2 to 7.6 for best results. If it is above 7.6, add SUN Dry Acid. If it is below 7.2, add SUN Dry Soda.
