SUN GRANULAR STABILIZED SPA CHLORINATING CONCENTRATE

ACTIVE INGREDIENT
 SODIUM DICHLORO-S-TRIAZINETRIONE DIHYDRATE 100%
 MINIMUM AVAILABLE CHLORINE 55%

**KEEP OUT OF REACH OF CHILDREN
 DANGER**

PRACTICAL TREATMENT

FIRST AID

If swallowed feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately.

If on skin. Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.

If in eyes. Flush with cold water for at least 15 minutes. Get medical attention.

SEE ADDITIONAL PRECAUTIONS ON SIDE PANEL

NET WT. 1 LB. (0.45 kg) 16 oz

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Recommended for spas operating at temperatures between 90°-105° F.

STARTUP

When starting up a suspended or freshly filled spa, make sure the filtration system is clean and operating properly. Then adjust and maintain the pH in the range of 7.5-7.8 using Sun Minus or Sun Plus as indicated by a reliable test kit. Adjust and maintain total alkalinity at 140-180 ppm based on the test kit results and the label directions on Sun Alkalinity Control. Superchlorinate by adding 1 oz. of Sun Chlorinating Concentrate per 500 gallons. Repeat this step if necessary to establish a positive free chlorine residual of 1.0-1.5 ppm.

DAILY

Add Sun Spa Chlorinating Concentrate prior to each use or as needed based on testing with a reliable test kit to maintain a free chlorine residual of 1.0-1.5 ppm. A suggested dosage of 1/2 to 3/4 oz. per 500 gallons provides this residual and should be added as indicated by daily tests for the chlorine residual. The dosage required to maintain 1.0-1.5 ppm free chlorine residual may vary due to unusual conditions

Such as heavy bather loads, wind, heavy rains, and high temperatures therefore, frequent use of a reliable test kit is recommended. Using the test kit as a guide, maintain the pH within the 7.5-7.8 range and total alkalinity at 140-180 ppm. In general, 1/4 oz. of Sun Spa Chlorinating Concentrate per 500 gallons of water will raise the chlorine residual by 1.0 ppm.

Add 1/2 to 1 oz. per 500 gallons after daily use has ceased. This superchlorination should be performed with circulation system operating and aeration shut off.

SUPERCHLORINATE USING SUN SPA CHLORINATING CONCENTRATE GRANULAR

Use 1 oz. per 500 gallons following each use or if algae appears, chlorine odors are noted, higher bather loads occur, or if a reliable test kit indicates presence of combined chlorine in excess of 0.2 ppm. Repeat this step if necessary to establish a positive free chlorine residual. Do not use the spa until the chlorine residual has dropped below 3 ppm.

PRECAUTIONARY STATEMENTS

HARMFUL TO FISH AND AQUATIC LIFE

DANGER

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARD

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance, contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT
 Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container, if possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.

Additional information on use and handling of this product may be obtained from Sun chemicals dealers or The Sun Pool Care Guide.
