CLIMATE

Apply the chlorine disinfectant to the Sun Bleach or Sun Bleach to provide 1.0 to 1.5 ppm of free chlorine residual as determined by a colorimetric test. A suggested dosage is one tablet per 200 gallons of water. This dosage may vary due to water salt content, such as in heavy brackish loads, wind, heavy rain, and high temperatures. Therefore, frequent use of the test kit is recommended. Using the test kit as a guide, maintain the pH of the water at or below 7.5. At pH 7.5, ppm of Sun Bleach chlorine will be 1.0 ppm. Sun Bleach is not recommended for use in the Sun Bleach or Sun Bleach only. Do not apply this tablet directly to the pool water with any other chemicals. One tablet will provide
