### DIRECTIONS

#### ROACHES AND ANTS:

Spray thoroughly all parts of infested area. Particular attention should be paid to all cracks and crevices in woodwork, dark places behind pipes and all places which are infested, hitting as many insects as possible.

#### FLIES AND MOSQUITOES:

Spray thoroughly the outside surfaces of screen doors, window frames, around light fixtures on porches and in garages to aid in reducing populations of flies and mosquitoes.

#### BROWN DOG TICKS AND FLEAS:

Spray thoroughly all localized infestation in outdoor areas where there is no vegetation.

#### CARPET BEETLES:

Spray thoroughly all baseboards. Spray underside of carpets and edges of top surface of carpeting.
