IN ACCORDANCE WITH THE FOLLOWING DIRECTIONS

FOR SPOT AND SURFACE APPLICATIONS ONLY

Mr. Scott's Pest Control is a Professional Pest Control formula and for Professional results should be applied inside and outside your home or business to create a chemical barrier that insects must cross to reach food or water.

First, treat the inside of your home to kill Fleas, Ants, Waterbugs, Silverfish, Crickets, Scorpions, Earwigs and Spiders.

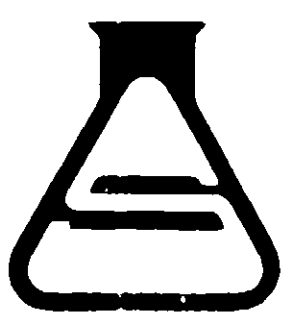

Start with the Kitchen: Apply a coarse spray to all baseboards, under the sink, behind and under all appliances. Apply spray to cabinets, window frames and wall area around drain board being very careful not to contaminate food, water, dishes or utensils. Treat all cracks and crevices where insects may hide. Apply coarse spray to baseboard of doors leading to the garage or back yard.

Next, Treat the Bathroom: Apply a coarse spray to all baseboards and to window frame. Remove clothes from hamper and spray the hamper. Apply spray under the lavatory and in linen storage. Be very careful not to contaminate containers, utensils or clothing.

Then, Treat the Bedrooms and Closets: Apply a coarse spray to all baseboards and window frames. Remove drawers from chests and spray inside chests. Apply coarse spray to door frame and baseboard in closet. Do not spray clothing.

Follow by Treating the Living Room: Apply a coarse spray to baseboards, window frames and the base of the door to the outside. Spray behind and under heavy furniture that is rarely moved.

Finish with the Garage: Apply a coarse spray on the bare of the walls and along the floor near the walls. Spray around, behind and under all appliances or heavy objects. Spray the outside door frame. Apply a coarse spray across the entire area beneath the garage door.
