 Office of Pesticide Programs
 Registration Division (7505C)
 401 "M" St., S.W.
 Washington, D.C. 20460

EPA Reg. Number:

9172-13

Date of Issuance:

JUL 26 1995

Term of Issuance: Until
 Reregistration

Name of Pesticide Product: Mr.
 Scott's Pest Control
 Concentrate with Time
 Release Dursban

NOTICE OF PESTICIDE:
 Registration
 Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Q. B. Scott Company, Inc.
 17400 Judson Road
 P.O. Box 33847
 San Antonio, Texas 78265-3847

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.
2. Change the label by revising the EPA Registration Number to read, "EPA Reg. No. 9172-13."
3. Submit two copies of the revised final printed label for the record.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

MIXING DIRECTIONS: This is a single use container and the entire contents of the bottle are to be used at one time. This concentrate refill will make one gallon of MR. SCOTT'S Pest Control with Time Release Dursban*. It is intended to be used only in an empty (labeled) MR. SCOTT'S Pest Control with Time Release Dursban* bottle and is not to be used in any other containers or bottles.

Pour the entire contents of this bottle into an empty one gallon MR. SCOTT'S Pest Control w/Time Release Dursban* bottle. Then fill this bottle with water and pour the contents into the gallon bottle. Repeat at least two additional times to completely rinse out the contents of this bottle. Add water to the one-gallon bottle to fill to approximately one inch from the top. REPLACE CAP AND SHAKE CONTENTS WELL BEFORE USE.

GENERAL PEST CONTROL INDOORS

DIRECTIONS FOR INDOOR USE: MR. SCOTT'S PEST CONTROL with Time Release Dursban* may be applied within residential and non-residential buildings or structures and within nonfood areas of industrial, institutional and commercial buildings, including hospitals, stores, manufacturing plants and warehouses. Apply as a localized spray to areas where insects are found or normally occur. Such areas including but are not limited to dark corners of rooms and closets; floor drains, cracks and crevices in walls; along and behind sinks, stoves, refrigerators and cabinets, and around plumbing and other utility installations. A PERIOD OF 4 TO 7 DAYS IS NORMALLY REQUIRED TO OBSERVE MAXIMUM EFFECTIVENESS ON INSECT POPULATIONS; THEREFORE, LIMIT RETREATMENT TO NO MORE OFTEN THAN ONCE EVERY 7 DAYS. Apply spray in such a manner as to minimize spray contact with non-target surfaces.

INDOOR PESTS CONTROLLED WITH MR. SCOTT'S PEST CONTROL with Time Release Dursban*: Ants (1), Brown Dog Ticks (2), Carpet Beetles (3), Centipedes, Cockroaches (4), Crickets, Earwigs, Fleas (5), Millipedes, Silverfish, Sowbugs, Spiders. (Numbers in parentheses refer to Specific Directions).

SPECIFIC INDOOR DIRECTIONS: (1) ANTS may be controlled by treating ant trails and wherever else these pests may find entrance such as around doors and windows. (2) BROWN DOG TICKS may be controlled by applying spray to infested areas, nearby cracks and crevices and along baseboards, windows and door frames where these pests may be present. For best results, old bedding should be cleaned or replaced. DO NOT TREAT PETS OR THEIR BEDDING WITH THIS PRODUCT. (3) CARPET BEETLES may be controlled by thoroughly applying the spray as a spot treatment along baseboards and edges of carpeting, under carpeting, rugs and furniture; in closets and on shelving. Spots are defined as areas not to exceed

4576

two square feet. Two spots cannot be connected. (4) COCKROACHES are best controlled by making crack and crevice or spot treatment. Treat where insects are found or normally occur including, but not limited to dark corners of rooms and closets; floor drains; cracks and crevices in walls; along and behind baseboards; beneath and behind sinks, stoves, refrigerators and around plumbing and other utility installations. Crack and crevice treatments are applied by delivering a pin stream or small amounts of solution directly into cracks and voids. Spot treatments are defined as areas not to exceed two square feet. Two spots cannot be connected. Limit spot application to less than 20% of the lower wall and floor surface. (5) FLEAS are best controlled by a total management program. It is suggested that infested areas be thoroughly vacuumed prior to treatment. These areas include all carpet, upholstered furniture, baseboards and other indoor areas frequented by pets. The vacuum cleaner bag should be discarded in an outdoor trash container. Pet bedding should be cleaned or replaced. Other than the applicant, premises should be vacated during application. Cover aquariums and fish bowls and remove other pets. DO NOT PERMIT HUMANS OR PETS TO CONTACT TREATED AREAS UNTIL SPRAY HAS THOROUGHLY DRIED. FLEA TREATMENTS ARE LIMITED TO SPOT APPLICATIONS. INDIVIDUAL SPOTS ARE NOT TO EXCEED 2 SQUARE FEET. TWO SPOTS MAY NOT BE CONNECTED. One-gallon of spray will cover 1,600 square feet. Adjust application rate to provide uniform coverage without soaking the treated areas. If fleas reappear in about 1-2 weeks after treatment it is probably because they have hatched from their pupal (cocoon) state. If this occurs, either repeat treatment or allow the products time release microcapsules another week to kill newly emerged fleas. DO NOT TREAT PETS OR THEIR BEDDING WITH THIS PRODUCT. Effective flea control includes controlling the source of fleas infestations. This can require treatment of pets with a product registered for flea control and treating outside areas frequented by pets. MR. SCOTT'S Pest Control with Time Release Dursban* can also be applied out-of-doors for flea control.

GENERAL PEST CONTROL OUTDOORS

Use MR. SCOTT'S PEST CONTROL with Time Release Dursban* to control outdoor pests by application as either a perimeter treatment or as a localized spray. Perimeter treatments help prevent infestation of buildings. When making perimeter treatments, apply MR. SCOTT'S Pest Control where pests are active or may find entrance. For example, treat a band of soil 6 to 10 feet wide around and adjacent to buildings and treat the building foundation to a height of 2 to 3 feet. Apply as a coarse spray at the rate of about 1 gallon of spray per 100 sq. feet. Thoroughly and uniformly wet the band area. Localized sprays provide control of insect pests on outside surfaces of buildings and other outdoor areas where pests congregate. Treat by applying the dilution directly to target areas such as cracks and crevices; along sidewalks or patios, windows and door frames, or other areas where pests may be present.

5976

OUTDOOR PESTS CONTROLLED BY MR. SCOTT'S

ANTS, COCKROACHES, CRICKETS, EARWIGS, FLEAS, FLIES, MILLIPEDES, MOSQUITOES, SCORPIONS (6), SOWBUGS, SPIDERS, TICKS, WASPS and YELLOWJACKETS. (6) For SCORPIONS remove accumulations of lumber, firewood and other materials which serves as harborage sites. Before stacking fire wood or lumber, apply MR. SCOTT'S Time Release Pest Control to surfaces immediately below such materials. Perimeter treatments may also be helpful in reducing pest immigration from surrounding areas.

GENERAL INFORMATION

MR. SCOTT'S PEST CONTROL with Time Release Dursban* is designed for use as a residual spray to control various pests in and around residential and non-residential structures. MR. SCOTT'S may be sprayed on any surface which will not be damaged or stained by water. A visible deposit may appear on some hard surfaces. This deposit can be easily removed with a cloth or damp sponge.

Do not apply this product to conduits, motor housings, junction and switch boxes, or other electrical equipment because of possible shock hazard.

ATTENTION: Do not allow spray to contact food or food-contacting surfaces, feedstuffs, or water supplies. Thoroughly wash dishes and food handling utensils with soap and water if they become contaminated by application of this product. Remove pets and cover fish bowls (tanks) before spraying. Do not use in fogging equipment to apply the product indoors. Do not allow adults, children or pets on treated areas until spray has dried. Keep out of fish pools or other bodies of water. Do not treat vegetable gardens. Do not use in poultry houses.

STORAGE AND DISPOSAL

(DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL.)

STORAGE: Store in original container in secured dry storage area. Prevent cross-contamination with other pesticides or fertilizers. Do not store above 122 degrees F for extended periods of time. Preferred storage is above 32 degrees F. Storage below 32 degrees F may result in solidification. If warmed to above 32 degrees F, product will return to original form. Freezing does not adversely affect this product. If container is damaged or spill occurs, use product immediately or dispose of product and damaged container as indicated below.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Do not reuse empty container. Wrap empty container in heavy paper, such as newspaper, and place in trash.

60/10

MANUFACTURER'S WARRANTY STATEMENT

MANUFACTURER MAKES NO WARRANTIES, EXPRESS OR IMPLIED. IN NO EVENT SHALL MANUFACTURER BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY KIND. This product conforms to the ingredient statement on the label. Directions regarding use of this product are based upon tests believed to be reliable. All statements made concerning this product apply only when used as directed and under normal use conditions. READ AND FOLLOW DIRECTIONS CAREFULLY. Timing and method of application, weather, mixture with other chemicals and any other influencing factors in the use of this product are beyond the control of the manufacturer. Buyer assumes all risks of use, storage and handling of this product.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful if swallowed. Harmful if absorbed through the skin. Do not get in eyes, on skin or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling and before eating or smoking. Remove contaminated clothing and wash before reuse. Keep away from food, feed stuffs and water supplies.

FIRST AID: IF SWALLOWED: Call physician or Poison Control Center immediately. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not give anything by mouth to an unconscious person. IF ON SKIN: Wash with plenty of soap and water. Get medical attention if irritation develops. IF INHALED: Remove to fresh air if symptoms of cholinesterase inhibition appear and get medical attention immediately. IF IN EYES: Flush with plenty of water for 5 minutes. Get medical attention if irritation persists. NOTE TO PHYSICIAN: Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine, only by injection is the preferable antidote. Oximes, such as 2-PAM/protopam may be therapeutic if used early; however, use only in conjunction with atropine. In case of severe acute poisoning, use antidote immediately after establishing an open airway and respiration.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to birds and wildlife. Do not apply directly to water. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent aquatic sites. Do not contaminate water by cleaning of equipment or disposal of waste. Do not contaminate water when disposing of equipment washwaters.
