DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

WHEN TO APPLY

Use anytime weeds are actively growing and temperature is above 60 degrees. Control is slower if weather is cool. Applications in Spring and Fall provide most effective. Apply when lawn is wet from rain, dew or sprinkling. On newly seeded areas wait until grass has been cut two or three times. Delay planting new grass for at least 3 weeks as 2, 4-D may temporarily inhibit seed germination of plant growth. Do not apply when turf is under stress from heat, moisture or drought. Do not over or under apply.

HOW TO APPLY:

Apply evenly over entire lawn area at the rate of 4 lbs. per 1000 sq. ft.. Use the suggested spreader settings as a guide being sure to check your spreader at the beginning at the application. Age and condition of spreader will affect application. Adjust your spreader if necessary. Be sure to shut off spreader while turning or stopping to prevent accidental over-application and burning of grass. Fill spreader on driveway or sidewalk to eliminate chance of spillage on grass. Do not hand spread. Rain, sprinkling or mowing within 24 hours may reduce effectiveness. Wait at least 2 weeks before making a second application.

IMPORTANT: Drift of dust or vapors may cause injury to susceptible plants such as vegetables, flowers, fruit trees and ornamentals. Avoid contact with flower beds or shrubs. If accidentally deposited on flowers or shrubs hose off immediately. Do not use on crops that will be used for food or forage purpose. Do not graze animals on treated areas. Do not contaminate water used for irrigation or domestic purposes.
