## KEEP OUT OF REACH OF CHILDREN

#### CAUTION

### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Harmful if swallowed. Avoid contact with skin, eyes and clothing. Wash thoroughly after using. Avoid breathing dust. Do not contaminate water used for irrigation or domestic purposes. Do not contaminate feed, foodstuffs or ponds. Do not store near seed, other fertilizers, insecticides or fungicides. Do not apply to vegetable crops.

# STATEMENT OF PRACTICAL TREATMENT

IF IN EYES: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes: Call a physician.

IF SWALLOWED: No specific intervention is indicated as the compound is not likely to be hazardous by ingestion. However, consult a physician if necessary.

IF ON SKIN: Wash with plenty of soap and water.

9198-50H Page 3 of 5

#### (BACK PANEL)

#### **HOMEOWNER USE ONLY**

(The above is for internal use only and will not appear on the final label copy)

#### **ENVIRONMENTAL HAZARDS**

This product is toxic to fish. Do not apply to water. Do not contaminate water by cleaning of equipment or disposal of wastes. Drift of dust may cause injury to nearby susceptible plants.

#### **DIRECTIONS FOR USE**

It is in violation of Federal Law to use this product in a manner inconsistent with its labeling.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

#### WHEN TO APPLY

Apply prior to germination of weed grasses in the spring. Precise time of application for a specific area will vary due to climate and individual cultural practices. Generally, application during February or March will give best results. Control can be expected by applications up to the time that Forsythias bloom in Spring. If in doubt, check with your Agricultural Extension Service. For newly seeded areas, apply as the last step before watering.

#### **HOW TO APPLY**

For best results, this product must be applied without skips or misses. Determine the correct amount for your lawn area. For freshly seeded grass apply at the rate of 2.6-3.3 pounds per 1,000 square feet. For established turf apply at 5.2-6.6 pounds per 1,000 square feet. The best results are obtained by using the two-step procedure at the recommended half rate settings. Apply half the required amount in one direction and the other half at right angles to the first application. This procedure will minimize the chances of color streaking and erratic crabgrass control. Use the suggested spreader settings as a guide, being sure to check the application rate at the start of each application. At lease ½ inch of water must be provided by rainfall or watering within 3 days of treatment in order to carry the chemical into the root zone of germinating needs.

### SUGGESTED SPREADER SETTINGS

(available at final printing)

### STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal. Keep container closed and away' from food, feedstuffs and domestic water supplies. PESTICIDE DISPOSAL: Securely wrap criginal container in several layers of newspaper and discard in trash. CONTAINER DISPOSAL: Do not reuse bag. Discard bag in trash.

## Optional Marketing Text for Subregistrant:

It stops the Grassy Weeds but allows the new grass seed to sprout! You may seed your lawn the same day that you apply my Crabgrass Preventer Plus New Seed Lawn Fertilizer.

- Controls Grassy Weeds before they emerge: (Contains Tupersan\*)
- For lawn repair and establishing new lawns from seed or sod.
- Provides complete new seeding lawn tertilizer with controlled release Nitrogen.

Fertilizer content for Subregistrant

**Guaranteed Analysis** 

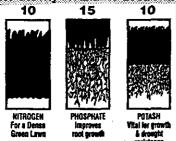

5.87% Ammoniacal Nitrogen

4.13% Urea Nitrogen\*

Soluble Potash (K<sub>2</sub>O) ...... 10%

Nutrients derived from: Ammonium Phosphate, Urea, Muriate of Potash and Polymer Coated Sulfur

\*2% Slowly Available Urea Nitrogen From Polymer Coated Sulfur Coated Urea

Additional Spreading Directions:

IMPORTANT: It is important to follow the directions as indicated so that injury will not occur to your lawn. Spreader settings are approximate. Differences may occur due to condition of spreader, speed at which applied, and roughness of area treated. Be sure to check spreader at the beginning of the application; adjust spreader if necessary.
