#### PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

#### CAUTION

Harmful if swallowed. Avoid contact with skin, eyes, or clothing. Wash thoroughly after using. Avoid breathing dust. Do not contaminate food or feedstuffs. Do Not Hand Spread.

#### ENVIRONMENTAL HAZARDS

Keep out of lakes, streams, or ponds. Do not contaminate water used for irrigation or domestic purposes. Do not contaminate water by cleaning of equipment or disposal of wastes. Drift of dust or vapors may cause injury to nearby susceptible plants, such as vegetables, flowers, fruit trees and ornamentals.

#### DIRECTIONS FOR USE

Use only in accordance with label directions. Do not use in a manner inconsistent with its labeling.

#### WHEN TO APPLY:

Use anytime weeds are actively growing and temperature is above 50°. Control is slower if weather is cool. Applications in Spring and Fall provide most effective kill. Apply when lawn is wet from rain, dew or sprinkling. On heavily seeded areas wait until grass has been cut two or three times. Delay application of grass for at least 3 weeks as 2,4-D may temporarily inhibit seed germination or plant growth. Do not apply when turf is under stress from heat, frost, or drought. Do not cover or under apply.

#### HOW TO APPLY:

Apply evenly over entire lawn area at the rate of 3.6 lbs. per 1000 sq. ft. Use the suggested spreader settings as a guide being sure to check your spreader at the beginning of the application. Age and condition of spreader will affect application. Adjust your spreader if necessary. Be sure to shut off spreader when turning or stopping to prevent accidental over-application and burning of grass. Fill spreader on driveway or sidewalk to eliminate chance of spillage on grass. Do not hand spread.

Use only when there is no hazard of drift. Rain, sprinkling, or mowing within 24 hours may reduce effectiveness. Wait at least 2 weeks before making a second application.
