OFFICE OF PREVENTION, PESTICIDES AND TOXIC SUBSTANCES

Debbie Ziehr
The Andersons Lawn Fertilizer Division Inc. d/b/a Free Flow Fertilizer
P.O. Box 119
Maumee, OH 43537

Subject: Label Notifications for Pesticide Registration Notice 2008-1

Dear Ms. Ziehr:

The Agency is in receipt of your Applications for Pesticide Notification under Pesticide Registration Notice (PRN) 2008-1 dated November 11, 2008 for:

# EPA Registration 9198-70

# The Andersons Weed & Feed

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2008-1 and finds that the label changes requested falls within the scope of PRN-2008-1. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Nicole Williams of my staff at 703-308-5551.

Sincerely, Packel C. Hollowan

Linda Arrington

RE:

Notification of Minor Label Change

SUBJECT:

The Andersons Weed and Feed

EPA Reg. No. 9198-70

Per PR Notice 2008-1 enclosed is EPA Form 8570-1, an application notifying the Agency of a revision to the labeling for the subject registration. One copy of the revised labeling is enclosed with deletions in red strikeout.

Deleted the following text from the Environmental Hazards section:

Do not apply to water, to areas where the surface water is present, or to intertidal areas below the mean high water mark except as noted on appropriate labels. Do not contaminate water when disposing of equipment wash waters or rinsate.

Replaced with the following:

To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems.

If there are any questions or comments regarding this notification, please contact me.

Sincerely,

The Andersons Lawn Fertilizer Division, Inc.

Debbie Ziehr

# THE ANDERSONS WEED & FEED

For products being sold into states with requirement for fertilizers:

Information regarding the contents and levels of metals in this product is available on the internet at http://www.regulatory-info-ap-com/

For products being sold into Kentucky that do not provide at least 1 lb. of nitrogen per application (mandatory fertilizer statement):

A lawn will typically utilize 1 to 4 pounds of nitrogen per 1,000 square feet per growing season. When used as directed, this product will supplement your regular fertilizer program by providing X pounds of nitrogen at the X lbs. per 1,000 square feet product application rate. Please consult with our local extension office for questions regarding a regular fertilizer program.

# KEEP OUT OF REACH OF CHILDREN CAUTION

#### PRECAUTIONARY STATEMENTS

## HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Harmful if swallowed. When using this product wear long-sleeved shirt, long pants, socks, and shoes. After using this product, remove clothing and launder separately before reuse.

FIRST AID	
If in eyes	Hold eye open and rinse slowly and gently with water for 15-20 minutes.
	Remove contacts, if present, after the first 5 minutes, then continue rinsing
	Call a poison control center or doctor for treatment advice
If swallowed	Call a poison control center or doctor for treatment advice
	Have person sip a glass of water if able to swallow
•	Do not induce vomiting unless told to by a poison control center or doctor
	Do not give anything by mouth to an unconscious person.
If on skin or	Take off contaminated clothing
clothing	Rinse skin immediately with plenty of water for 15-20 minutes
_	Call a poison control center or doctor for treatment advice
If inhaled	Move person to fresh air
	• If person is not breathing, call 911 or an ambulance, then give artificial
	respiration, preferably mouth-to mouth if possible
*	• Call a poison control center or doctor for treatment advice
Have the produc	ct container or label with you when calling a poison control center or doctor or going

for treatment. You may also contact 1-800-757-8951 for emergency medical treatment information.

**ENVIRONMENTAL HAZARDS** 

This pesticide is toxic to fish and aquatic invertebrates. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Do not apply to water, to areas where the sufface water is present, or to intertidal areas below the mean high water mark except as noted on appropriate labels. Do not contaminate water when disposing of equipment wash waters or rinsate.

#### (BACK PANEL)

To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

## **DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

#### **General Precautions and Restrictions**

Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. Do not allow people or pets to enter the treated area until dusts have settled.

Drift of dust or vapors may cause injury to nearby susceptible plants such as vegetables, flowers, fruit trees and ornamentals. Avoid contact with flower beds or shrubs. If accidentally deposited on flowers or shrubs hose off immediately. Do not use on crops that will be used for food or forage purposes. Do not graze animals on treated areas. Do not contaminate water used for irrigation or domestic purposes.

#### WEED CONTROL

This product contains 2,4-D, a herbicide which controls Broadleaf Plantain, Buckhorn Plantain, Dandelion, Purslane, Pigweed and Smartweed. For Use on Turf except Desirable Clovers, Bent, St. Augustine, Dichondra and Carpet Grass.

# When to Apply

Use anytime weeds are actively growing and temperature is above 60 degrees F. Control is slower if weather is cool. Applications in Spring and Fall provide most effective kill. Apply when lawn is wet from rain, dew or sprinkling. On newly seeded areas, wait until grass has been cut two or three times. Delay planting new grass for at least 3 weeks as 2,4-D may temporarily inhibit seed germination or plant growth. Do not apply when turf is under stress from heat, moisture or drought. Do not over or under apply.

# **How to Apply**

Apply evenly over entire lawn area at the rate of 3-3.2 lbs. per 1000 sq. ft. Use the suggested spreader settings as a guide being sure to check your spreader at the beginning of the application. Use only when there is no hazard of drift. Rain, sprinkling, or mowing within 24 hours may reduce effectiveness. Wait at a least 2 weeks before making a second application. The maximum number of broadcast applications per treatment site is 2 per year.

## **SPREADING HINTS**

It is important to follow the directions as indicated on this quality lawn care product as over application may cause injury to your lawn. Determine how much fertilizer you need. Using the chart below as a reference, multiply the length of your lawn by its width. This equals your total square footage. Deduct any non-lawn areas (house, gardens, etc.) One bag of this product covers approximately X,XXX sq. ft. Next, using a clean, properly adjusted spreader, apply the material evenly. (A drop-type or broadcast-type spreader, may be used. See charts below for suggested settings.) Avoid skipping areas.

## (BACK PANEL)

Drop spreaders - First, apply 2 border strips alone	g the edge of each end of the lawn (see dia

Drop spreaders - First, apply 2 border strips along the edge of each end of the lawn (see diagram). Then apply product along the length of the lawn, overlapping slightly, shutting off the spreader before turning as you reach the edge of the border strips.

(Diagram of drop spreader path-Path A)

Broadcast Spreaders - For best results, apply in a circular path starting on the outside and working toward the center (see diagram). A little overlap of products will ensure complete coverage.

# **Application Precautions:**

It is important to follow the directions as indicated on this quality lawn care product to avoid over-application. Calculate the size of area to be treated and do not over or under apply. Spreader settings are approximate. Differences may occur due to age and condition of spreader, speed at which applied and roughness of area treated. Calibrate spreader prior to use according to the manufacturer's directions. Check frequently to be sure the equipment is working properly and distributing uniformly. Be sure to shut off spreader while turning or stopping to prevent accidental over-application and burning of grass. Fill spreader on driveway or sidewalk to eliminate chance of spillage on grass. Promptly clean-up any spills. Do not hand spread.

Recent research has shown that well-maintained turf is an effective environmental buffer that prevents pollutants from entering our natural water bodies. To help protect these natural resources, please avoid applying product to sidewalks, driveways, roadways, and other impervious surfaces which are adjacent to storm drains. Sweep any misplaced granules back onto the area you are treating immediately after application, since storm drains often empty directly to nearby waterways.

# STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal. Keep container closed and away from food, feedstuffs and domestic water supplies.
