### **QUARANTEED ANALYSIS**

Total Nitrogen (N)	26.00%			
26.00% Urea Nitrogen*	÷			
Soluble Potash (K2O)	6.00%			
Plant nutrients derived from urea, potassium chloride, polymer coated sultur coated urea.				
*3.90% Slowly Available Nitrogen from Polymer Costed Suff	tur Coated Urea			

A learn will typically utilize 1 to 4 pounds of nitrogen per 1,000 eq. ft. per growing season. When used as directed, this product will supplement your regular fertilizer program by providing 0.93 pounds of nitrogen at the 3.6 b, per 1,000 eq. ft. application site. Please consult with your local sclension office for questions regarding a regular fertilizer program.

## Directions For Use

it is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

## Storage & Disposal

Cook of containing with (lood, or feed by storage and disposal.

PETITIONE STURMER: Keep container closed and away from food, feedstuffs and domestic water su
DISPOSAL: If single: Normeflable Container. Do not reuse or retill this container. Offer for recycling,

if evaluate. If party fillet: Call your local solid waste egency for disposal instructions. Never place unused product down any indoor or outdoor death.

This product has a preemorpator herbidde which is applied to established turigresses for the control of ennual bluegrase (For ennual), smooth and hairy crabgrase, goosegnase, silver crabgrase or crowlood, beinyardgrase (watergrase), and green end yellow totals. This product controls these ennual weeds by billing their seeds as they germinate. Apply before these ennual weeds byin to germinate since it does not control established weeds. When explied as directed, the following established furfiguress are toterant Kentucky Bluegrass. Feacus, St. Augustinegrass, Centipodegrass, Perennial Ryegrass, Zoyatagrass, Behlagrass, Bormudegrass.

Chemicals that effectively control annual weed seeds may also affect new destrable turigrass seedings. Research ground for at least 6 weets after applying. When research, it is essential that proper cultural practices such as soll cuttivation, infrastron and fertilization be followed. For satisfactory researching results after using this product, the amount of seed used should be increased and equipment designed to place seed in contact with the soil (such as the Rogers Aero Seeder) should be employed. When using this product at the highest recommended rate, researching should be delayed 12 to 18 weeks after application.

The submitted Education of the buffgress area without sidge or misses. A more uniform application can be made with broadbast (rotary) type spreadors by spreading half the required amount over the area and then applying the remaining half at right englies. Both drop type and rotary type spreadors may be used. Avoid the use of spreaders which would apply the material in narrow, concentrated bands. Calibrate applicators prior to use according to the meanthablure's directions. Check frequently to be sure equipment is working properly and distributing uniformly.

## uggested Spreader Settings

NOTE: It is important to follow the directions on this quality lawn care product as over-application may cause injury to the lawn. Measure the size of the area to be treated and do not over or under apply. Spreader settings are approximate. Differences may occur due to confident of spreader at which applied and roughness of area treated. Calibrate spreader prior to use according to the rer's directions. Check frequently to be sure equipment is working properly and distributing Close apreader when filling, stopping or turning. DO NGT HAND SPREAD.

## BROADCAST SPREADER SETTINGS

For best results, apply in a circular path starting on the outside and working toward the center (see Broadcast Spreader Path diagram at left). A little overlap of product will ensure complete
