Ms. Debbie Ziehr The Andersons Lawn Fert. Div., Inc. d/b/a Free Flow Fertilizer P.O. Box 119 Maumee, OH 43537

Subject: Notification of Minor Label Changes (Marketing Claims) Under PR Notice 98-10 The Andersons Tee Time Fertilizer with 1.15% Team EPA Reg. No. 9198-79 Application, Dated January 12, 2011

Dear Ms. Ziehr:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the subject product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10. The label submitted with the application has been date-stamped "Notification" and will be placed in our records.

If you have any questions, please call me directly at (703) 305-1243 or Susan Stanton of my staff at (703) 305-5218.

Sincerely, Tryn V·1119

Kathryn Montague, Product Manager 23 Herbicide Branch Registration Division (7505P) Office of Pesticide Programs

RE: Notification of Minor Label Change

SUBJECT: The Andersons Tee Time Fertilizer with 1.15% Team* EPA Reg. No. 9198-79

Per PR Notice 98-10 enclosed is EPA Form 8570-1, an application notifying the Agency of a revision to the homeowner version of the labeling for the subject registration. One copy of the revised labeling is enclosed with changes marked in blue.

We have made the following change by notification:

1. Added optional marketing program as noted on page 7 of the label.

If there are any questions or comments regarding this notification, please contact me.

Sincerely,

The Andersons Lawn Fertilizer Division, Inc.

For products being sold into Washington state:	

Information regarding the contents and levels of metals in this product is available on the internet at http://www.regulatory-info-ap.com./

For products being sold into Kentucky:

A lawn typically will utilize 1 to 4 pounds of nitrogen per 1,000 square feet per growing season. When used as directed, this product will supplement your regular fertilizer program by providing *(*No. of Ibs.*) pounds of nitrogen per 1,000 square feet (Optional P2O5 and K2O levels) and herbicide to control listed weeds. Please consult your local extension office for questions regarding a regular fertilizer program.

PRECAUTIONARY STATEMENTS

FIRSTAID	
If swallowed:	 Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told by a poison control center or doctor.
If in eyes:	 Hold eye open and rinse slowly and gently with water for 15-20 minutes.
6596 0 0090	 Remove contact lenses, if present, after the first 15 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice.
lf ରହି କାର୍ୟାରି or clothing: ⁶	 Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
lf inhaled:	oco. Move person to fresh air.
9 9 0 0 9 9 2 9 9 2	$\int \frac{1}{2} \cos^{6} dt$ If person is not breathing, call 911 or an ambulance, then give artificial respiration,
Q	se c call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to Ehysician: Probable mucosal damage may contraindicate the use of gastric lavage.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Warning: Causes substantial but temporary eye irritation. Harmful if swallowed or absorbed through skin, or inhaled. Do not get in eyes or on clothing. Avoid contact with skin. Avoid breathing dust. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Remove contaminated clothing and was clothing before reuse.

• Personal Protective Equipment (PPE): Wear goggles or face shield.

User Safety Recommendations: Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

9198-79H Page 3 of 7

(BACK PANEL) HOMEOWNER USE ONLY (for internal use only, will not appear on final label)

ENVIRONMENTAL HAZARDS

This pesticide is extremely toxic to freshwater marine, and estuarine fish and aquatic invertebrates including shrimp and oyster. Do not apply directly to water. Do not apply in a manner which will directly expose canals, lakes, streams, ponds, marshes or estuaries to aerial drift. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

Pesticide Storage: Keep container closed and away from food, feedstuffs and domestic water supplies. **DISPOSAL:**

If empty: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

GENERAL INFORMATION

This product has a preemergence herbicide which is applied to established turfgrasses for the control of annual bluegrass (Poa annua), smooth and hairy crabgrass, goosegrass, silver crabgrass or crowfoot, barnyardgrass (watergrass), and green and yellow foxtail. This product controls these annual weeds by killing their seeds as they germinate. Apply before these annual weeds begin to germinate since it does not control established weeds. When applied as directed, the following established turfgrasses are tolerant:

Kentucky bluegrass	Centipedegrass	Zoysiagrass	St. Augustinegrass
Perennial ryegrass	Fescue	Bermudagrass	Bahiagrass

Reseeding

Chemicals that effectively control annual weed seeds may also affect new desirable turfgrass seedings. Reseeding should be delayed for at least 6 weeks after applying. When reseeding, it is essential that proper cultural practices such as soil cultivation, irrigation and fertilization can be followed. For satisfactory reseeding results after using this product, the amount of seed used should be increased and equipment designed to place seed in contact with the soil (such as the Rogers Aero Seeder) should be employed. When using this product at the highest recommended rate, reseeding should be delayed 12 to 16 weeks after application.

Application Equipment

Apply evenly over the turfgrass area without skips or misses. A more uniform application can be made with broadcast (rotary) type spreaders by spreading half the required amount over the area then applying the remaining half at right angles. Both drop type and rotary type spreaders may be used. Avoid the use of spreaders which would apply the material in narrow, concentrated bands. Calibrate applicators prior to use according to the manufacturer's directions. Check frequently to be sure equipment is working properly and distributing uniformly.

Suggested Spreader Settings

(Available at final printing)

Note: It is important to follow the directions on this quality lawn care product as over-application may cause injury to the lawn. Measure the size of the area to be treated and do not over or under apply. Spreader settings are approximate. Differences may occur due to condition of spreader, speed at which applied and roughness or area treated. Calibrate spreader prior to use according to the manufacturer's directions.

(BACK PANEL) HOMEOWNER USE ONLY (for internal use only, will not appear on final label)

Check frequently to be sure equipment is working properly and distributing uniformly. Close spreader when filling, stopping or turning. Do not hand spread.

Broadcast Spreader Settings

{diagram}{diagram}

For best results, apply in a circular path starting on the outside and working toward the center (see Broadcast Spreader Path diagram at left). A little overlap of product will ensure complete coverage.

3.2# Rate
10 – 11
7 1⁄2 - 8 1⁄2
2 1⁄2
4 1/2
27 - 28

Drop Spreader Settings

{diagram}{diagram}

First apply 2 border strips along the edge of each end of the lawn (see Drop Spreader Path diagram at left). Then apply product along the length of the lawn, overlapping slightly and shutting of the spreader before turning as you reach the edge of the border strips.

3.2# Rate	
Earthway 7350	4 ½ -5 ½
Precision FH22	8 ½ - 9
Republic EZ530/75350	5 1⁄2 - 8 1⁄2
Scotts PF4	5-6
Scotts Accuareen	51/2-6

{Note: spreaders and settings vary due to market conditions and availability. Spreaders listed on final product label will be dependent on market availability and subregistrants.}

GENERAL PRECAUTIONS AND RESTRICTIONS

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

Apply to the turf prior to the germination of weed grasses since this product will not control established weeds. This product may thin established annual bluegrass (Poa annua) turfs and fine-leaved fescues at rates above 1.72 pounds per 1000 sq. ft. This product should not be applied in the spring to turfgrass planted the previous fall. In bermudagrass areas that have been overseeded with winter grasses, a spring application may thin the overseeded grasses. Because of varying cultural practices, this product should not be used on putting greens. Do not use on dichondra. This product should not be applied to newly sprigged areas of bermudagrass, St. Augustinegrass or Centipedegrass until these turfs are well established. **Entry Restrictions:** Do not allow people or pets to enter the treated area until dusts have settled. If

watering-in is required after the application, do not enter or allow others to enter the treated areas (except those involved in the watering) until the watering-in is complete and the surface is dry.

Application Restrictions: Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application.

APPLICATION INSTRUCTIONS

Rates, Frequency of Timing of Application

Successful preemergence control of the annual grass weeds listed on this label requires proper timing of application.

9198-79H Page 5 of 7

(BACK PANEL) HOMEOWNER USE ONLY (for internal use only, will not appear on final label)

Apply approximately one to two weeks prior-to-the germination of-annual grass-weeds. All-summer-annual -grasses do not germinate at the same time. If application timing does not coincide with the normal germination period of any of the annual grass weeds listed on this label, weed control results may be erratic or poor. Optimum weed control performance will be obtained if treated areas are irrigated soon after application.

Any cultural practices that disturb the soil, such as aerification or verticutting, should be done prior to application.

- 1. Spring germinating summer annual grasses crabgrass, foxtails and barnyardgrass
 - A. Northern (cool season) turfgrasses

For preemergence control, apply 3 to 4 pounds per thousand square feet in the spring one to two weeks prior to the onset of conditions favorable for annual weed grass seed germination.

B. Southern (warm season) turfgrasses

For preemergence control, apply 4 to 6 pounds per thousand square feet in the late winter or early spring one to two weeks prior to the onset of conditions favorable for annual weed grass seed germination.

In areas of the United States where germination of the annual weed grass species continues for extended periods of time, a second application of this product from one half to the full recommended rate may be made 8 to 10 weeks after initial treatment for continued control.

2. Late spring, early summer germinating annual grasses - goosegrass Although classified as a summer annual grass, goosegrass normally germinates 4 to 6 weeks later than crabgrass, foxtails and other summer annual grass species. Applications should, therefore, be timed accordingly.

A. Northern (cool season) turfgrass

For preemergence control, apply 4 pounds per thousand square feet in the late spring or early summer one to two weeks prior to the expected germination of goosegrass.

- B. Southern (warm season) turfgrasses
 For preemergence control, apply 4 to 6 pounds per thousand square feet in the late spring or early summer one to two weeks prior to the expected germination of goosegrass.
- 3. Northern and southern turfgrasses

In areas of the United States where preemergence control of both early germinating annual grasses (crabgrass, foxtails and barnyardgrass) and the later germinating goosegrass is desired, two applications from one half to the full recommended rate spaced 8 to 10 weeks apart may be made to provide full season control of these annual grass species.

4. *Poa annua* (annual bluegrass)

In areas of heavy infestation of annual bluegrass, its elimination will temporarily result in thin turfgrass areas. Irrigation and soil incorporated reseeding will encourage existing desirable turfgrasses and newly planted seeding turfgrasses to fill in these thin areas previously occupied by annual bluegrass.

- A. Northern (cool season) turfgrasses For preemergence control, apply 4 pounds per thousand square feet in late summer or early fall and again in late winter or spring one to two weeks prior to the expected germination of annual bluegrass.
- B. Southern (warm season) turfgrasses
 For preemergence control, apply 6 pounds per thousand square feet in the late summer or early fall one to two weeks prior to the expected germination of annual bluegrass. In
