DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

SURFACE INSECT CONTROL

Apply at the rate of 2.6-3.6 lbs. per 1000 square feet, or the equivalent of 0.75-1.0 lbs. actual active ingredient per acre. At this rate, the product will control chinch bugs, sod webworms (lawn moths), ants, billbugs, brown dog ticks, crickets, cutworms, earwigs, grasshoppers, armyworms, centipedes, clover mites, fiery skipper, fleas, greenbugs, June beetles, leafhoppers, millipedes, mites, mosquitoes, sowbugs and ticks.

Treat when insects first appear, re-treat as necessary.

*The following advisory statement is optional and may be omitted by some subregistrants:*  
For best results, product should be watered in after application.

GRUB CONTROL

Apply at the rate of 2.6 – 3.6 lbs. per 1000 square feet, or the equivalent of 0.75 – 1.0 lbs. actual active ingredient per acre. At this rate, the product will control certain white grubs (larvae of European chaffer and Japanese beetle).

Treat when grubs are young and actively feeding near the soil surface. Consult your local agricultural extension service for proper time to treat in your area. For best results, product should be thoroughly watered in to wash the insecticide into the zone of insect infestation.

To control Hyperodes (turfgrass) weevils, uniformly apply 3.6 pounds of granules per 1,000 sq. ft. as directed above. Treat suspected problem areas in mid-April and again in mid-May. Consult your local Agricultural Extension Service specialists for best time to treat in your area.

Maximum application rate is 1 lb. ai per acre (3.6 pounds of product per 1,000 square feet).

SUGGESTED SPREADER SETTINGS  
(available at final printing)

Important: These settings are only approximate. Age and condition of spreader can cause wide variation. Be sure to calibrate your spreader with each application. Do not hand spread.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal. Keep container closed and away from food, feedstuffs, and domestic water supplies. **PESTICIDE DISPOSAL:** Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate, is a violation of Federal Law and may contaminate groundwater. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. **CONTAINER DISPOSAL:** Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State or local authorities, by burning. If burned, stay out of smoke.
