OFFICE OF PREVENTION, PESTICIDES AND TOXIC SUBSTANCES

SUBJECT:

Label Amendment Submissions of 11/22/93 in Response to PR Notice 93-7

EPA Reg. No.: SEE ATTACHED 9/198-58

Dear Registrant:

The labeling cited above and submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, successfully REMOVES THE PRODUCT FROM THE SCOPE of PR Notice 93-7 one the comments (if any) on the attached sheet are addressed. Other than the alterations (if any) listed on the attached sheet, no further alterations to the labeling are necessary to reflect the requirements of the Worker Protection Standard.

Since your amendment proposes to delete uses directly and/or to delete uses implicitly through the use of exclusionary statements), the Agency will publish in the Federal Register a notice of receipt of your amendment to delete uses, as required by section 6(f)(1) of FIFRA. The Agency will defer action for 90 days from the date of the Federal Register notice to give affected minor users an opportunity to try to persuade you to retain the uses(s). When the comment period has expired, the Agency will approve the amendment unless you have withdrawn it, and stamp the amended labeling "accepted." Your stamped-accepted labeling will then be sent to you.

As described in Supplement A of PR Notice 93-11 (self-verification option), you may sell and distribute product bearing the submitted labeling before you receive a copy of your stamped-accepted labeling. Note that your registration is not amended until the comment period required by section 6(f)(1) of FIFRA has expired and the Agency has approved the amendment. Therefore, you may withdraw your proposed amendment at any time during the comment period and until you receive your stamped-accepted labeling.

Sincerely,

James Tompkins, Deputy Chief Registration Support Branch Registration Division (7505W)

Precautionary Statements

#### CAUTION

#### Hazard to Humans and Domestic Animals

CAUTION: Avoid contact with eyes. If in eyes, flush with plenty of water. Harmful if swallowed, inhaled or absorbed through the skin. Use eye protection and protective clothing such as coveralls, a long-sleeved shirt and impermeable gloves when handling this product. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

Do not allow children or pets on lawn until 1/2" of water has been applied to lawn and the water had dried (or, if wet conditions persist, until 24 hours have passed).

9198-98 Page 3 of 5

#### Statement of Practical Treatment

IF IN EYES: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Call a physician.

IF SWALLOWED: Call a physician or Poison Control Center. Drink one or two glasses of water and induce vomiting by touching finger to the back of throat. Never give anything by mouth to an unconscious or convulsing person.

IF ON SKIN: Wash with soap and plenty of water. Get medical attention if irritation persists.

IF INHALED: If breathing difficulty occurs, move individual to fresh air and get medical attention.

NOTE TO PHYSICIAN: Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine is an antidote by injection only.

#### Environmental Hazards

This pesticide is extremely toxic to fish, birds, and other wildlife. Do not apply directly to water. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent aquatic sites. Cover or incorporate spills. Do not contaminate water when cleaning of equipment washwaters.

### Directions For Use

It is in violation of Federal law to use this product in a manner inconsistent with its labeling.

Not for use on plants being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

The Andersons Tee Time 25-3-8 With 0.87% Team/0.58% Dursban is a combination of growth promoting fertilizer ingredients, a preemergent herbicide, and a turf insecticide. It is designed to control smooth and hairy crabgrass, goosegrass (silver crabgrass or crowsfoot), barnyard grass (watergrass), green and yellow foxtail, and annual bluegrass (Poa Annua), as well as ants, armyworms, billbugs, brown dog ticks, chinch bugs, crickets, cutworms, earwigs, grasshoppers, and sod webworms.

When applied as directed, the product can be used on the following turfs: Kentucky Bluegrass, perennial ryegrasses, centipedegrass, fescue, zoysiagrass, bermudagrass, St. Augustinegrass, and bahiagrass. The product will not harm nearby established ornamental trees and shrubs.

9198-98 Page 4 of 5

### Application Directions

Apply at the rate of 4 pounds per 1,000 sq.ft. Because Andersons lee Time 25-3-8 With Team/Dursban is generally applied very early in the insect cycle, it may be necessary to give a second treatment of insecticide late in the season.

# Use Precautions

Apply The Andersons Tee Time With Team/Dursban to the turf prior to the germination of weed grasses since The Andersons Tee Time With Team/Dursban will not control established weeds. The Andersons Tee Time With 0.87% Team/0.58% Dursban should not be applied in the spring to turfgrass planted the previous fall. In bermudagrass areas that have been overseeded with winter grasses, a spring application of The Andersons Tee Time With Team/Dursban should not be used on putting greens. The Andersons Tee Time With Team/Dursban should not be used on dichondra. The Andersons Tee Time With Team/Dursban should not be applied to newly sprigged areas of bermudagrass, St. Augustinegrass or Centipedegrass until these turfs are well established.

# Reseeding

Chemicals that effectively control annual weed seeds may also affect new desirable turfgrass seedlings. Reseeding should be delayed for at least 6 weeks after applying The Andersons Tee Time With Team/Dursban. When reseeding, it is essential that proper cultural practices such as soil cultivation, irrigation and fertilization be followed. For satisfactory reseeding results after using The Andersons Tee Time With Team/Dursban the amount of seed used should be increased and equipment designed to place seed in contact with the soil (such as Rogers Aero Seeder) should be employed. When using The Andersons Tee Time With Team/Dursban reseeding should be delayed 12 to 16 weeks after application.

# Application Equipment

Apply The Andersons Tee Time With Team/Dursban evenly over the turfgrass area without skips or misses. A more uniform application can be made with broadcast (rotary) type spreaders by spreading half the required amount over the area and then applying the remaining half at the right angles. Both drop type and rotary type spreaders may be used. Avoid the use of spreaders which would apply the material in narrow, concentrated bands. Calibrate applicators prior to use according to the manufacturer's directions. Check frequently to be sure equipment is working properly and distributing uniformly.

Suggested Spreader Settings

(This section will be completed for final labeling)

9198-98 Page 5 of 5

# Storage and Disposal

Storage: Store in original container only. In case of spill, contain material and dispose as waste. Do not contaminate water, food or feed by storage and disposal.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

#### WARRANTY

MANUFACTURER warrants that this product (1) conforms to the ingredient statement on the label and (2) is reasonably fit for the purposes set forth in the Directions for Use. EXCEPT AS SO WARRANTED, THE PRODUCT IS SOLD AS IS. MANUFACTURER MAKES NO OTHER WARRANTY EXPRESS OR IMPLIED.

The manufacturer's directions regarding use of this product are based upon tests believed to be reliable. All statements made concerning this product apply only when used as directed, under normal use conditions. FOLLOW DIRECTIONS CAREFULLY. Timing and method of application, weather and turf conditions, mixture with other chemicals not specifically recommended and other influencing factors in the use of this product are beyond the control of the manufacturer.
