# DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For use only on home lawns. Do not use on crops grown for food or forage.

## APPLICATION

BAYLETON® fungicide is absorbed rapidly and works systematically from within the plant. Rainfall or sprinkler irrigation soon after application will assure rapid systemic uptake. Control will be less effective on turf suffering from drought stress. Therefore, in order to achieve maximum control, plants should be maintained in a vigorously growing state through good cultural practices.

Apply when the turf is fully established and actively growing. Application should be applied at recommended intervals to maintain disease control.
