**ENVIRONMENTAL HAZARDS**

This pesticide is toxic to aquatic invertebrates and wildlife. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high-water mark. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwater or rinsate.

This chemical is known to leach through soil into groundwater under certain conditions as a result of label use. Use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

This chemical can contaminate surface water through spray drift. Under some conditions, it may also have a high potential for runoff into surface water for several days to weeks after application. These include poorly draining or wet soils with readily visible slopes toward adjacent surface waters, frequently flooded areas, areas overlaying extremely shallow ground water, areas with infield canals or ditches that drain to surface water, areas not separated from adjacent surface waters with vegetated filter strips, and areas over-laying tile drainage systems that drain to surface water.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

A broad spectrum fungicide for control of the following diseases: Brown Patch, Dollar Spot, Copper Spot, Gray Leaf Spot, Stem Rust of Bluegrass, Helminthosporium, Curvularia, Leaf Spot, Melting out, Brown Blight, Red Thread, Anthracnose, Gray Snow Mold, Fusarium Patch and Algae.

Daconil is a multiple site (MS) fungicide that controls the disease by attacking several different vital systems of the fungus. Despite several decades of ongoing usage, there have been no demonstrations of pathogen resistance to Daconil.

Application must be made before snow cover in autumn. **Golf course tees and greens:** If snow cover is intermittent or lacking during the winter, a second application of this product at 5.2 lbs. per 1,000 sq. ft. (11.3 lbs. ai/A) may be applied one month after the first application. **General turf:** If snow cover is intermittent or lacking during the winter, a second application of this product at 3.76 lbs. per 1,000 sq. ft. (8.2 lbs. ai/A) may be applied one month after the first application.

**Fusarium Patch** - In areas where pink snow mold (*Microdochium nivale*) is likely to occur, apply at 5.2 lbs. per 1,000 sq. ft. (11.3 lbs. ai/A) in combination with products containing iprodione such as Andersons Golf Products Fertilizer plus Fungicide VIII. Read and observe all label directions for products containing these active ingredients. For control of Fusarium patch only in areas where snow cover is intermittent or lacking during the winter, apply 5.2 lbs. per 1,000 sq. ft. (11.3 lbs. ai/A) of turf area.
