Ms. Debbie Ziehr Product Registration The Andersons Lawn Fert. Div., Inc PO Box 119 Maumee, OH 43537

JAN 8 2010

SUBJECT: Application for Pesticide Notification (PRN 98-10) Request Alternate Brand Name "The Andersons Turf Products Fertilizer with 0.103% Dimension Turf Herbicide 19-0-0" EPA Reg. No. 9198-120 Application Dated November 12, 2009

Dear Ms. Ziehr:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 dated 11/12/09 for the above product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action(s) requested fall within the scope of PRN 98-10. The label submitted with the application has been stamped "Notification" and will be placed in our records.

If you have any questions, please call me directly at 703-305-6249 or Owen F. Beeder of my staff at 703-308-8899.

Sincerely,

Linda Arrington Notifications & Minor Formulations Team Leader Registration Division (7505P) Office of Pesticide Programs

KEEP OUT OF REACH OF CHILDREN CAUTION PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Causes eve initiation. Harmful if inhaled. Avoid contact with eves or clothing. Avoid breathing dust. Wash thoroughly with soap and water aller handling. Remove contaming ded clothing and wash before reuse. Protonged or frequently repeated skin contact while handling this material may cause allergic reaction in some individuals.

FIRST AID

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes Remove contacts, if present, alter the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice

aled: Move person to tresh air. If person is not breathing, call 911 or an ilance, then give artificial respiration, preferably mouth-to-mouth il possible. Call sison control center or doctor for treatment advice

If swallowed: Call a poison control center or doctor for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless lold to by a poison control center or doctor. Do not give anything by mouth to an nscious person

If on skin or clothing: Take of contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-757-8951 for emergency medical treatment information.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and highly toxic to other acuatic organisms including ovsters and shrimp. Use with care when applying to turl areas adjacent to any body of water. Drill and sumity, costs min card minin approval of the areas section in order to deal body of a main cost in unoff itom theaded luif may advessly allocat sequelic organisms in adjaconi taquatic sites Do not apply directly to water, or to areas where surface water is present, or to interlicat areas below the mean high water mark. Do not apply which weather conditions lavor critit from treated areas. Do not contaminate water when disposing of equipment washwaters,

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in any manner inconsistent with its Is a wavalue or recette take to use this product in any manner Moonssteint with its tabeling. Read the entire tabel before using this product. Use only according to tabel instructions. Not for use on turt being grown for sale or other commercial use as sod, or for research purposes. New York Use Restrictions: In New York State this product may only be used by protessional applicators and at no more than 11.0 pounds per 1,000 square teet (equal to 0.5 pounds active ingredient per acre) per year; and is prohibited from use in Nassau and Sulfolk Counties,

GENERAL INFORMATION

This product is a herbicide that provides control of crabgrass and other annual grasses and broadleal weeds in established lawns and ornamental turts, including gott course tairways, roughs, and tee boxes. This product will not harm nearby established ornamentals when used according to label directions.

USE PRECAUTIONS

Turigrass Salety: This product may be used on seeded, sodded, or sprigged lawns and ornamental luris that are well-established. The grass must have developed a good root system and a uniform stand, and have received at least two movings following is seeding, sodding, or sprigging before it can receive its lirst application of this product. Use of this product on lawns and ornamental turks that are not well-established, or on those that have been weakened by weather-, pest-, disease-, chemical-, or mechanical-related stress, may increase the chances for furl injury.

This product should only be applied to lawns and omamenial turfs that are composed of The following turgrass species that have been determined to be tolerant to applications of this product. When applied as directed under the conditions described the tolkwing established turigrasses are lolerant to this product:

phuroides

destinum)

son Grasses SS. Creeping" (Agrostis palustris) SS. Kenlucky (Poa pratensis) Ene", (Fostuca rubra) Lall (Festuca arundinaces) IS. perennial (Lolium perenne)	Wirm-Season Grasses Bahlagrass (Paspalum notatun Bermudagrass (Cynodon dac) Butlatograss ("Buchloe dach) Carbergrass (Avronpour affinis) Carbupadagrass (Fermochioa c Kituyugrass (Permisetum clan Si Augustinegrass (Stenoteph Zovisiagrass (Zovisia genorica)

Cool-Sea Benigra Bluegra Fescue, Fescue, Ryegras

Control of Crahorass

F292

"Use of this product on certain variables of creeping bentorass, such as "Cohansey" 'Carmen', 'Seaside', and 'Washington' may result in undesirable turlgrass injury. Not all varieties of creeping bendrass have been lested. DO NOT apply this product to Colonial Bentorass (Acroslis tenuis) varieties. "Use of this product on certain varieties of fine tescue may result in undesirable turl

b) the product of carlar valides of the result have been load of the product of the product "Atlanta", "Baner," Bauty, "Bigart, "GF-2, "Enjoy", HF-93, "Highlight," Ivalo", "Jamestown, "Koket," Majenta", "Mary, "Penniawn", "Tamara", "Taijana", "Wakdort and "Wakdina", Not all varieties of line fescue have been tested.

***DO NOT use this product on seeding buffalograss in the spring of the first year of establishment until the turfgrass is fully green and has established new roots.

Note: It is recommended that use of this product be made on a trial basis initially to determine its sately under local use coorditions and turt management practices before making widespread use

Reseeding, Overseeding, or Sprigging: Reseeding, overseeding, or sprigging of treated areas within 4 months after application of this product may inhibit the establish-ment of desirable turtigrasses. When reseeding or overseeding, proper cultural practices such as soft culturation, imgation and fertilization should be followed. For bost results, use mechanical or power seeding equipment (slil seeders) designed to give good seed to soil contact

Other Use Precautions: The early postemergence crabgrass control described below is limited. Postemergence applications are only effective on crabgrass if applied before craborass has displayed its fifth leat or first tille

For best results, cultural practices that disturb the soil, such as core-spike- or hydro aeritication, and verticutting, should be done before application of this product. DO NOT apply this product until the grass has recovered from these cultural practices.

Apply this product directly to established lawns or organized burls only. DO NOT apply lowers, vegetables, shrubs, or trees,

DO NOT use clippings from treated turl for mulching around vegetables or fruit trees. Keep people and pets oil treated areas until dust has settled.

APPLICATION DIRECTIONS

Preemergence and Early Postemergence Control: This product provides "preemer gence" control of crabgrass (including the large, smooth, and southern species) when applied prior to the emergence of crabgrass from the ground in established lawns and omamental luris

It can also provide "early postemergence" control of crabgrass during the early stages of crabgrass growth after the crabgrass has emerged from the ground. However, it is ollen difficuit to see the very small, early stages of crabgrass in well-established lawns and ornamental turts. Postemergence crabgrass control will be obtained only when this product is applied prior to the tillering of crabgrass, which generally corresponds to the time when you can first easily see the gradgrass plants in the lawn or turl. So the practical benefit of this product's additional, early postemorgence activity is that (compared to strictly preemergence crabgrass products) it can give the user a 2-4 week longer period of time to make applications and still control crabgrass

Application Frequency and Timing: This product may be applied as a single application, as a split application, or as a sequential application for craburass control in the spring, summer, or fall. DO NOT apply more than 11 lbs. per 1,000 sq. II. per application, and no more than 33 lbs. per 1,000 so. II. per year

Spring Applications - For single applications made in the spring or early summer this product should be applied at the appropriate rate corresponding to one of the three control programs listed in Table 1 below, depending on the user's location, the turgrass moving height, and whether the use is considered to be preemergence or early postermergence at the time of the application. The duration of residual weed control

provided by this product is circretly related to the total rate applied, but will vary somewhat depending on weather, weed pressure, lurigrass competitiveness, and the user's location within a region

Use Program 1 for preemergence control at sites where the turfgrass is cut high (e.g., homeowner lawne). This program pupyides 3.5 months of presementance craburass control. This program should not be used for early postemergence crabgrass control

Use Program 2 for preemergence control at sites where (a) turigrass is cut low (e.g., golf (airways), and (b) lurigrass maintenance or weed control has been conducted during the previous year. This program provides 4-6 months of preemergence crabgrass control. This program may also be used for early postemergence control at sites where turgrass is cut bioh (e.o., homeowner lawns).

Use Program 3 for preemergence control at sites where (a) turigrass is cut low (e.g., golf lairways), and (b) lust maintenance or weed control has not been conducted during the previous year. This program provides 4-6 months of preemergence crabgrass control. This program may also be used for early postemergence control at sites wh is cut low (e.g., goll lairways).

Subsequent, sequential pre- and/or postemergence applications should be made where longer periods of control are desired.

Where split fertilizer applications are recommended, the rates in Table 1 may be split across two applications made 6-10 weeks apart and prior to crabgrass emergence.

PROGRAM	1 1	2	3 Preemergence (kow)	
USE (turlgrass cut)	Preemergence (high)	Presmergence (kow)		
REGION		Postemergence (high)	Postemergence (iow)	
North	2.8	4.0	55	
Transition	4.0	5.5	84	
South	5.5	8.4	11.0**	
Coastal South	8.4	11 0"	11.0"	

*DO NOT apply more than 11 lbs, per application, and no more than 33 lbs, per year, Postemergence control is limited; see "Crabgrass Control" and "Precautions" sections above, Regions include areas listed below.

North: All other areas.

Transition: DE, KS, KY, MD, MO, NJ, VA, southeastern PA, southern areas of IL, IN, OH, & coastal areas of CT, NY, & RI. South: AL, AR, AZ, CA, GA, LA, MS, NC, NM, NV, OK, SC, TN, & TX. Coastal South: HI, FL, & southern coastal areas of AL, GA, LA, MS, NC, SC. & TX.

"May require solit or sequential applications for full control

Fall Applications: This product can also be applied in the late summer or early fall (late August Ihrough November) at the "Program 3" use rates listed in Table 1 to provide control of craborass through the early part of the next spring. The fall application should be followed by an appropriate spring application to provide season-long control

Tips for Improved Control: For best results, apply this product within a few days after mowing and delay mowing again for a few days after the application. When treated lawr or ornamental turl areas are watered or receive significant rainfall within a few days after application of this product improved weed control may result. Use of solit (hall-rate) applications spaced 6-8 weeks apart may provide improved weed cont

CONTROL OF OTHER GRASS AND BROADLEAF WEEDS

Spring Applications: Used as directed for crabgrass control in the spring, this product will also control (at the "Program 3" rates) or suppress (at the "Program 2" rates) the following weeds when applied prior to their emergence: barnyardgrass, bluegrass (annual, roughslalk), crowloolgrass, toxlail (yellow & green)*, goosegrass, ikkuyugrass, ryegrass (annual & perennial), smulgrass, lespedeza (common), oxalis (buttercup, creeping & vellow woodsorrel), purslane (common), speedwell (com), spurge (prostrate & spotted) controlled at the "Program 2" rates.

Fall Applications: Used as directed for late summer or early fall use, for crabgrass control through the early part of the next spring. This product will also controt (at the "Program 3" rates) or suppress (at the "Program 2" rates) the following weeds when applied prior to their emergence: bluegrass (annual) - Poa annua, bittercress, chickweed, henbit, geranium (Carolina), parsley-piert, pineappleweed, shepherdspurse.

APPLICATION EQUIPMENT AND INSTRUCTIONS

Apply this product with drop or rotary-type spreaders designed to apply granular herbicides. Avoid the use of spreaders that would apply this product in narrow rows or concentrated bands. Before each application, calibrate the spreader according to the equipment manufacturer's directions for adjusting the spreader settings such that the spreader delivers the appropriate application rate recommended above. Apply this product uniformly over the lawn or ornamental turi area. A more uniform application can be made by spreading hall of the required amount over the area and then applying the remaining hall at a right angle to the previous direction. Avoid streaking, skips, or overlaps during application. Check equipment frequently to ensure equipment is functioning property and applying uniform distribution of granules.

SUGGESTED SPACEADER CETTICGS These suggested speader settings are not included to replace calibration. Please calibrate four screece below applying product,

STORAGE AND DISPOSAL

Do not contaminate water, lood, or feed by storage and disposal

STORAGE: Keep container closed and away from food, feedstulls, and domestic water supplies

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide is a violation of Federal Law. If these wastes cannot be disposed of by use according to tabel instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Nonrelillable container. Do not reuse or relill this container. Offer for recycling, if available. If not available, then dispose of empty bag in a sanitary landfill or by incinerat or, if allowed by State or local authorities, by burning. If burned, stay out of smoke.

IMPORTANT: READ BEFORE USE:

Read the entire Directions for Use and the Warranty Disclaimer and Limitation of Liability before using this product. If terms are not acceptable, return the unopened product container at once. By using this product, user or Buyer accepts the following Warranty Disclaimer and Limitation of Liability:
