Subject:

Notification per PR Notice 98-10 – Minor Label Changes

The Andersons Dimension Herbicide II

EPA Reg. No.: 9198-120

Application Dated: August 4, 2014

Dear Ms. Ziehr:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the subject product.

The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10. The label submitted with the application has been date-stamped "Notification" and will be placed in our records.

If you have any questions regarding this letter, please feel free to contact Terri Stowe at (703) 305-6117 or via e-mail at stowe.terri@epa.gov.

Sincerely,

Kathryn V. Montague Product Manager 23

RE:

Notification of Minor Label Changes

SUBJECT:

The Andersons Dimension Herbicide II

EPA Reg. No. 9198-120

Per PR Notice 98-10 enclosed is EPA Form 8570-1, an application notifying the Agency of a revision to the homeowner version of the labeling for the above subject registration. One copy of the revised labeling is enclosed with the change as follows.

We have added the following to comply with those states with nitrogen application restrictions

NOTE: For those states with nitrogen application restrictions, including Maryland, New Hampshire, New Jersey and Virginia, do not apply more than XX.XX lbs. of this product per 1,000 sq. ft.

No other changes were made.

If there are any questions or comments regarding this notification, please contact me.

Sincerely,

The Andersons Lawn Fertilizer Division, Inc.

Debbie Ziehr

GUARANTEED ANALYSIS

Total Nitrogen (N)	16%
Available Phosphate (P ₂ O ₅)	
Soluble Potash (K ₂ O)	
Primary Plant Food derived from: Urea, Muriate of Potash, Ammoniated Phospha	

Optional fertilizer information:

XX% Nitrogen – Gives your lawn a deep green color. Stimulates plant growth and greens lawns quicker XX% Phosphate – Promotes normal root development. Strong, vigorous roots are essential for absorbing water and plant nutrients

XX% Potash – Potash helps improve your lawn's hardiness to protect against disease and tolerate drought. Information regarding the contents and levels of metals in this product is available on the internet at http://www.wa.gov/agr/

When applied as directed, this product meets the minimum standards for non-nutritive metals established by the Association of American Plant Food Control Officials.

For information on this product or other premium quality {brand name} product, please call us at 1-800-231-4595.

For best results, this product should be used in conjunction with {product name} to correct {nutrient} deficiency.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS KEEP OUT OF REACH OF CHILDREN CAUTION

Causes eye irritation. Harmful if inhaled. Avoid contact with eyes or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse. Prolonged or frequently repeated skin contact while handling this material may cause allergic reaction in some individuals.

FIRST AID

If in eyes	Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contacts, if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice.
If inhaled	Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to mouth if possible. Call a poison control center or doctor for treatment advice.
If swallowed	Call a poison control center or doctor for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
If on skin or clothing	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

(The above is for internal use only and will not appear on the final label copy)

ENVIRONMENTAL HAZARDS

This product is toxic to fish and highly toxic to other aquatic organisms including oysters and shrimp. Use with care when applying to turf areas adjacent to any body of water. Drift and runoff from treated turf may adversely affect aquatic organisms in adjacent aquatic sites. Do not apply when weather conditions favor drift from treated areas. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in any manner inconsistent with its labeling.

Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

New York Use Restrictions: Do not apply more than 5.6 pounds of this product per 1,000 square feet of turfgrass area per year. Do not make more than one application per year.

NOTE: For those states with nitrogen application restrictions, including Maryland, New Hampshire, New Jersey and Virginia, do not apply more than XX.XX lbs. of this product per 1,000 sq.ft.

Use only according to label instructions.

GENERAL INFORMATION

This product is a combination product that provides both crabgrass control and [the required nutrients] or [a required nutrient] for [optimum] turfgrass growth all in a single product.

This product contains Dimension, a crabgrass preventer that can be applied up to 4 weeks later than other crabgrass preventers and provide up to 4 months control of crabgrass and other grass and broadleaf weeds prior to their establishment in lawns and ornamental turfgrasses. This product should be applied to lawns and ornamental turfgrasses that are well established (See "Use Precautions" section below for a list of the tolerant turfgrasses). This product will not harm nearby established ornamentals when used according to label directions.

USE PRECAUTIONS

This product should only be applied to lawns and ornamental turfgrasses that are well established. Use of this product on lawns and ornamental turfgrasses that are not well established, or have been weakened by stress due to mechanical operations, pests, excessive temperatures, or lack of moisture may increase the changes for turfgrass injury.

c c c c c

(The above is for internal use only and will not appear on the final label copy)

The Andersons Dimension Herbicide

can be applied to the following turfgrasses when applied as directed:

Cool-Season Turfgrasses

- Creeping Bentgrass Fine Fescues
- Kentucky Bluegrass
- Perennial Ryegrass
- Tall Fescues

Warm-Season Turfgrasses

- Bahiagrass
- Bermudagrass
- Buffalograss
- Carpetgrass
- Centipedegrass
- St. Augustinegrass
- Zoysiagrass

This product should be applied in the spring or fall prior to the weed seed germination in established lawns and ornamental turfgrasses.

This product can be applied up to 4 weeks later than other crabgrass preventers and still provide season-long weed control of crabgrass. Dimension herbicide provides preemergence control of crabgrass and other weeds when applied prior to their germination, and it also provides postemergence control of crabgrass. The postemergence control provided by this product is limited to crabgrass only and will provide control of crabgrass when applied up to 4 weeks after crabgrass germination. Application of this product later than 4 weeks after crabgrass germination will result in reduced control of crabgrass.

For control of other grass and broadleaf weeds, this product must be applied as a preemergent treatment. Only crabgrass can be controlled with delayed applications after germination.

Tips for Improved Weed Control: For best results, apply this product within a few days after mowing and delay further mowings after the application of this product until the lawn or ornamental turfgrass has been watered or received significant rainfall to dissolve the fertilizer granules. Improved weed control may be observed when treated lawn or ornamental turfgrass is watered or receives rainfall within a few days after application of this product.

Reseeding, Overseeding, or Sprigging of turfgrasses into areas that have been previously treated with this product should be delayed until 16 weeks after application. Reseeding, overseeding, or sprigging upto 16 weeks after application may prevent the establishment of the newly reseeded, overseeded or sprigged turfgrasses.

- •DO NOT apply more than 11 pounds of this product per 1,000 square feet of turfgrass area during the year (1.000 square feet area = 100 feet x 10 feet).
- •DO NOT apply to flowers, vegetables, or fruit trees.
- •DO NOT use clippings from treated turf for mulching around flowers, vegetables or fruit trees.
- Keep people and pets off treated areas until dust has settled.

APPLICATION DIRECTIONS

The Andersons Dimension Herbicide II will provide control of crabgrass and other grasses and broadleaf weeds listed below when applied prior to weed seed germination in established lawns and ornamental. a turforasses.

Weeds Controlled and/or Suppressed by The Andersons Dimension Herbicide

(The above is for internal use only and will not appear on the final label copy)

Grass Weeds:

Annual Bluegrass Annual Ryegrass Barnyardgrass Crabgrass Crowfootgrass Gooesegrass Green Foxtail Kikuyugrass (seedling) Perennial Ryegrass Smutgrass (seedling) Yellow Foxtail

Broadleaf Weeds:

Bittercress
Buttercup Oxalis
Carolina Geranium
Chickweed
Common Lespedeza
Common Purslane
Corn Speedwell

Creeping Oxalis
Henbit
Parsley-piert
Pineappleweed
Spotted Spurge
Yellow Woodsorrel

Application Timings:

This product may be applied either in the spring or in the fall for the control of weeds.

When this product is applied in the fall, a sequential or second application should be made the following spring to provide season-long control of weeds.

Length of Control:

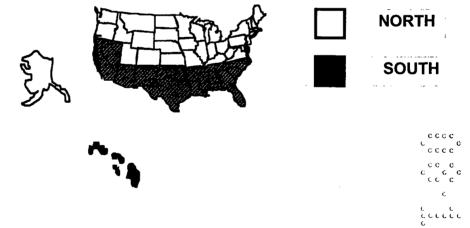

This product will provide up to 4 months of weed control if applied according to label directions.

The actual length of control will vary depending on use rate, weather conditions, condition of the turfgrass, intensity of weed pressure, and the location or "Region" within the United States that this product is being applied.

Please check the map below to determine which "Region" of the U.S. that applies to your particular use area.

Use "Regions" within the United States:

SUGGESTED SPREADER SETTINGS

(Available at Final Printing)

Broadcast Spreaders: For best results, apply in a circular path starting on the outside and working toward the center. A little overlap of product will ensure complete coverage.

Drop Spreaders: First, apply 2 border strips along the edge of each end of the lawn. Then apply product along the length of the lawn, overlapping slightly and shutting off the spreader before turning as you reach the edge of the border strips.

Important: It is important to follow the directions as indicated on this quality lawn care product as overapplication may cause injury to the lawn. Measure the size of the area to be treated and do not over or under apply. Spreader settings are approximate. Differences may occur due to condition of spreader, speed at which applied, and roughness of area treated. Calibrate spreader prior to use according to the manufacturer's directions. Check frequently to be sure equipment is working properly and distributing uniformly. Close spreader when filling, stopping or turning. Do not hand spread.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

STORAGE: Keep container closed and away from food, feedstuffs and domestic water supplies.

DISPOSAL:

If empty: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. If party filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

GENERAL INFORMATION - LANDSCAPE ORNAMENTALS

This product provides preemergence control of listed annual grass and broadleaf weeds in landscape ornamentals. It may be applied to soil surfaces where ornamental plants are grown for aesthetic purposes in ornamental gardens, and residential properties.

Ornamental plants on this label have shown tolerance to this product when applied as directed. It is impossible, however, to evaluate tolerance for all ornamental plant species or varieties or under all possible growing conditions. Under your growing conditions, a limited area involving only a few plants should be treated for tolerance evaluation prior to large-scale applications. C C C C

USE RATES

Apply this product with a properly calibrated spreader which will assure accurate, even particle distributions. This product may be applied as a single application or as a split application. Refer to the following table for product recommendations when treating a small area.

DO NOT apply more than 16 pounds per 1,000 square feet per year. Do not apply in Nassau and Suffolk Counties of New York. c c

Pounds of Product per 1,000 square feet 11

Ounces of Product per 100 Square Feet 17.6

(The above is for internal use only and will not appear on the final label copy)

APPLICATION TIMING AND RECOMMENDATIONS

This product is a preemergence herbicide that will not control established weeds. Make applications prior to weed seed germination or to bare ground. The best weed control is obtained when applied to soil that is free of clods, weeds and debris such as leaves. Prior to making an application, control existing vegetation by hand weeding, cultivation or with a postemergence herbicide. Once an application of this product has been made, do not disturb the soil surface as the herbicide barrier will be broken.

PRECAUTIONS

- Only apply this product to established ornamentals.
- Do not apply this product directly to bare root of ornamental plants as injury may result.
- Do not incorporate this product into soil. Dilution of active ingredient and possible injury to plant roots may occur.
- Do not apply to soil around ornamental plants that are under stress due to drought, flooding, excessive
 fertilizer or soil salts, wind injury, hail, frost damage, winter injury, injury from previously applied pesticides
 or injury due to insects, nematodes or disease.
- To avoid foliar damage to ornamentals, irrigate immediately after application to remove herbicide particles from the foliage.
- Do not apply under conditions that would affect product distribution. Wind could affect distribution and move product onto sensitive species. Uneven product distribution will result in uneven weed control.
- Do not apply this product on grasses grown for seed.
- Do not graze livestock or feed forage cut from areas treated with this product.

TOLERANT ORNAMENTALS

When applied as directed under the conditions described on this label, ornamentals listed below have shown tolerance in field trials. However, this product has not been tested on all cultivars of each species or under all possible growing condition. Follow directions given above to determine plant tolerance under your growing conditions prior to large scale use.

{brand name} Premium 4-step Program

- 1 {brand name Crabgrass Preventer}
 - March Early May
 - Prevents Crabgrass, Foxtail, Goosegrass, Poa annua and other Annual Weed Grasses.
 - Nutralene feeds your turfgrass for up to 2 months with long-lasting deep greening
- 2 {brand name Weed & Feed}
 - May June
 - Kills Dandelions, Clover, Plantains, and over 200 other weeds
 - Nutralene feeds your turfgrass for up to 2 months with long-lasting deep greening
- 3 {brand name Lawn Food}
 - June August
 - Nourishes your lawn throughout the summer months with extended feeding of Nitrogen
 - Nutralene feeds your turfgrass for up to 2 months with long-lasting deep greening
- 4 {brand name Winterizer & Weed Control}
 - Late August Mid October
 - Kills Dandelions, Clover, Plantains, and over 200 other weeds
 - · Maximizes root building and winter hardiness
 - Nutralene feeds your turfgrass for up to 2 months with long-lasting deep greening OR

{brand name Winterizer}

- Late August November
- Maximizes root building and prepares your lawn for winter dormancy
- Nutralene feeds your turfgrass for up to 2 months with long-lasting deep greening
