US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (TS 767) WASHINGTON, DC 20460 NOTICE OF PESTICIDE: <input checked="" type="checkbox"/> REGISTRATION <input type="checkbox"/> REREGISTRATION (Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)	EPA REGISTRATION NO. 9198-125	DATE OF ISSUANCE 30 SEP 1992
	TERM OF ISSUANCE CONDITIONAL, EXPIRES: JANUARY 1, 1995	
	NAME OF PESTICIDE PRODUCT The Andersons Barricade™ herbicide III	

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

The Andersons Lawn Fertilizer Division
 c/o/a Free Flow Fertilizer
 P.O. Box 119
 Madree, OH 43537

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(C) provided that you:

1. Add the phrase "EPA Registration No. 9198-125" to the label before you release the product for shipment.
2. Submit five (5) copies of the final printed labeling before you release the product for shipment.

and provided that Sandoz Agro, Inc., the manufacturer of the active ingredient of this product, submits the required data to continue the registration of proflarime as listed in the EPA fact sheet no. 231.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions. A stamped copy of the label is enclosed for your records.

BARRICADE® HERBICIDE III

Active Ingredient:

Prodiamine [N ³ ,N ³ -Di-n-propyl-2,4-dinitro-6-(trifluoromethyl)-m-phenylenediamine]	0.48%
Inert Ingredients:	99.52%
Total	100.00%

BARRICADE® is a Registered Trademark of Sandoz, Ltd.

KEEP OUT OF REACH OF CHILDREN
CAUTION

See Back Panel For Additional Precautionary Statements

For selective preemergence control of grass and broadleaf weeds in established turf grasses and landscape ornamentals.

ACCEPTED
with COMMENTS
in EPA Letter Dated

30 SEP 1992

NET WEIGHT _____ LBS.

Treats up to _____ Sq. Ft.

Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended, this pesticide
registered under EPA Reg. No.

GUARANTEED ANALYSIS

Total Nitrogen (N) 27%
Available Phosphoric Acid (P₂O₅) 5%
Soluble Potash (K₂O) 15%

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Causes moderate eye injury (irritation). Harmful if inhaled or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Prolonged or frequently repeated skin contact while handling the material may cause allergic reactions in some individuals.

STATEMENTS OF PRACTICAL TREATMENT

If in eyes: Flush thoroughly with water for several minutes. Get medical attention if irritation persists.

If on skin: Wash with soap and water. Rinse thoroughly. Get medical attention if irritation persists.

If inhaled: Remove victim to fresh air.

ENVIRONMENTAL HAZARDS

This product has low solubility in water. At the limits of solubility, this product is not toxic to fish. However, at concentrations above the level of water solubility, it may be toxic to fish. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites. Do not contaminate water when disposing of equipment washwaters.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in original container away from other fertilizer, feed, or food stuffs and separated from other pesticides.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Completely empty container into application equipment. Then dispose of empty container in a sanitary landfill or at an incineration facility, or ; if allowed by state and local authorities, by burning locally. If burned, stay out of smoke.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with it's labeling.

This product is a selective preemergence herbicide that provides residual control of many grass and broadleaf weeds in turf grasses and landscapes. This product controls susceptible weeds by inhibiting weed seeds germination and root development. For most effective weed control this product must be incorporated by 1/2 inch of rainfall, irrigation or shallow mechanical incorporation. Incorporation should take place as soon as possible after application and should not be delayed past 14 days from the date of application.

4/28

Do not apply this product through any type of irrigation system.
Do not apply aurally.

APPLICATION DIRECTIONS

Apply uniformly through suitable, calibrated commercial application equipment.

ESTABLISHED TURF

This product is a selective preemergence herbicide that, when properly applied, will control certain grass and broadleaf weeds in established grass turf. The species of turf grass determines the maximum amount of material that may be applied during a year.

Most effective weed control in turf grasses will be obtained when this product is activated by at least 1/2 inch of rainfall or irrigation within 14 days after application and prior to weed germination. See the map below for approximate crabgrass germination dates.

CRABGRASS GERMINATION DATES:

APPROXIMATE DATE

(PICTORIAL - MAP OF USA)

Foxtails (yellow, green) tend to germinate before crabgrass; therefore, if targeting foxtails apply this product three (3) weeks before the corresponding crabgrass germination date.

USE PRECAUTIONS:

The following use precautions apply to the use of this product in turf grasses:

Application of this product may thin emerged annual bluegrass and newly over seeded grasses.

Do not apply to FALL SEEDED TURF until the following spring, and only after the second mowing.

Do not apply to SPRING SEEDED TURF or to newly set sod until the following year.

Application of this product to turf stressed by drought, low fertility, or pest damage may result in turf injury.

Do not apply this product to tees or greens, or to areas where dichondra, colonial bentgrass, velvet bentgrass or annual bluegrass (*Poa annua*) are desirable species.

Maximum Annual Rates

This product should not be applied above a maximum annual rate of 314 lbs./A or 7.2 lbs./1000 sq. ft.

Turf Species and Rates

For season long control this product may be applied as a single application, or if needed followed by a second application for increased length of control. The length of time of residual weed control provided by this product is related to the rate applied. Use the higher rate within the listed range for longer control. Longer control is desirable in areas where crabgrass germinates between January 1 and April 20 (See Crabgrass Seed Germination Data Map).

Select maximum use rate based on turf grass species. All applications must be made prior to germination of the target weed seeds.

Turf rates listed in the table below are for weed control of approximately 2-6 months.

TURF SPECIES AND RATES TABLE:

Turf Species	Minimum and Maximum Rate of this product per Calendar Year Lbs./A (Lbs./1000 sq. ft.)
Bermudagrass Centipedegrass Seashore Paspalum Tall Fescue Zoysia	66-314 (1.5-7.2)
Perennial Bluegrass Perennial Ryegrass	66-218 (1.5-5.0)
Creeping Red Fescue St. Augustinegrass	66-157 (1.5-3.6)
Creeping Bentgrass min. 1/2 inch height	66-139 (1.5-3.2)
Bermudagrass newly sprigged or plugged¹	66-109 (1.5-2.5)

¹ Suppression only, of Foxtail, Goosegrass and Rescuegrass due to reduced product rates.

- * Do not apply more than 157 lbs. of this product per application.
- * Do not make more than 2 applications per calendar year.
- * Do not apply more than 314 lbs. of this product per calendar year.
- * If making two applications, wait at least 60 days after the 1st application before making a second application.
- * Use higher rates of this product to achieve higher levels of fertility and weed control for each turf type.

WEEDS CONTROLLED

When used at the recommended rates (see Turf Species and Rates Table) this product will control:

Annual Bluegrass	Knotweed
Common Chickweed ¹	Oxalis
Crabgrass (Large, Smooth)	Prostrate Spurge
Foxtails (Yellow, Green)	Rescuegrass ³
Goosegrass ²	Shepardspurse ¹

Herbit

1. Fall Application
2. For the best control of goosegrass apply 157 lbs./A. Sixty (60) days later make a second application with 52 to 157 lbs./A of product (see information in Turf Species and Rates section above).
3. Suppression only.

OVERSEEDING/RESEEDING

This product will inhibit the germination of turf species if overseeded/reseeded too soon after application. The interval between application and overseeding/reseeding is dependent on the application rate, soil temperature, and soil moisture. A shorter interval is possible if growing conditions are warm and wet, while a longer interval is needed if conditions are cool and dry.

Use the Overseeding/Reseeding Intervals Table below as a guide when choosing the appropriate overseeding/reseeding interval for each situation.

OVERSEEDING/RESEEDING INTERVALS TABLE:

Barricade III Rate (lbs./A)	Overseeding/Reseeding Interval (months) Based Upon Seeding Method and Predominant Soil Conditions for the Season			
	Broadcast Seeding		Slit/Drill Seeding	
	Wet & Warm	Cool & Dry	Wet & Warm	Cool & Dry
66-110	4	6	3	4
111-220	8	12	6	8
221-314	12	18	9	12

LANDSCAPE ORNAMENTALS

This product will not harm most established ornamental trees, shrubs and flowers when applied to surrounding areas in accordance to the directions given in the Turf Species and Rates section. The following species have shown tolerance to this product.

WARRANTY STATEMENT

MANUFACTURER warrants that this product (1) conforms to the ingredient statement on the label and (2) is reasonably fit for the purposes set forth in the Directions for Use. EXCEPT AS SO WARRANTED, THE PRODUCT IS SOLD AS IS. MANUFACTURER MAKES NO OTHER WARRANTY EXPRESS OF IMPLIED.

The manufacturer's directions regarding use of this product are based upon tests believed to be reliable. All statements made concerning this product apply only when used as directed, under normal use conditions. FOLLOW DIRECTIONS CAREFULLY. Timing and method of application, weather and crop conditions, mixture with other chemicals not specifically recommended and other influencing factors in the use of this product are beyond the control of the manufacturer. Buyer assumes all risks of use, storage or handling of this product.
